

Joint Framework Agreement on the United Nations Sustainable Development Goals

Paris, France- July 2019

Whereas, chemical sciences have the potential to play a pivotal role in enriching the future of Earth and its people and addressing global challenges will require a cooperative effort between governments, industry, academia, and non-governmental organizations;

Whereas, the Sustainable Development Goals (SDGs) are a global framework established by the United Nations to address many of the most critical issues impacting our world. We, the undersigned, recognize the power of chemistry to achieve these goals and build a sustainable future for the benefit of humanity; and

Whereas, while each country or region will advance the SDGs based on their unique needs, collaboration will multiply the force and effect of these efforts for the planet;

Therefore, be it resolved, the undersigned chemical societies commit to collaborating and identifying local solutions to global challenges - using the SDGs as a guide.
