

ACS Spring & Fall Meetings

Reimagining the must-attend events for the global chemistry enterprise.

Future of Meetings Top Features

Creating **greater collaboration** in joint programming opportunities.

Providing **Hot or Late Breaking programming topics**.

Offering **fewer concurrent sessions**.

Presenting **more engaging topics and networking opportunities**.

Increasing **attendance and engagement** during sessions.

Increasing the number of **prominent distinguished speakers** from industry and academia.

Redefine the ACS Meeting experience

Creating an exceptional global meeting experience that ACS Spring / Fall Meetings are the “must attend” events for chemical sciences.

Generating greater attendance, focus, and participation from industry, the global scientific community, early career researchers, and students

Making meetings easier to navigate through more focused programming, fewer venues, and meeting tools.

Driving diversity in membership, programming, and overall participation.

Designing opportunities for increased interdisciplinary programming.

Future of Meetings Timeline

2024

- Convene Future of Meetings (FoM) Programming Workshop
- Launch Global Virtual Symposia as part of the digital experience (Spring)
- Pilot New Attendee Orientation and Sunday Networking event
- Pilot new half-day joint interdisciplinary sessions led by ACS Committee on Science
- Pilot new formats, including integrated poster sessions (Fall)

2025

- Roll-out of experimental program changes and evaluation
- Offer 3.5 days of technical sessions (Fall)
- Launch a multi-program operational approach
- Pilot new half-day interdisciplinary sessions led by ACS Committee on Science
- Pilot new industry-targeted solutions-based sessions (Fall)
