

is for juice.

Jasper drives a juicemobile
Throughout the neighborhood.
He sells all kinds of juices
That look and taste so good.

He's made a juice from cabbage—
The flavor is brand new.
But customers won't drink it.
They don't like juice that's blue.

There is an easy answer—
Something that you can add
To change the juice's color,
And start a cabbage fad!

NEW JUICE USE

What You'll Need:

- red cabbage leaf
- warm water (about 1/2 cup)
- plastic zip-closing bag
- plastic cup
- vinegar
- teaspoon

1. Tear the cabbage leaf into small pieces and place in the plastic bag.

2. Add the warm water and close the bag tightly.

3. With your fingers, squish the cabbage leaves until the water turns blue. This is your cabbage juice.

4. Pour the cabbage juice back into the cup. Add a teaspoon of vinegar and mix well.

What happens to your cabbage juice?
