

# Tt is for tornado.

Toto's daily science class  
Has lots of things to do—  
Activities with test tubes,  
Experiments with goo.

Toto also reads about  
The sun and clouds and rain.  
He knows about tornadoes  
That spin your weather vane.

Twisters twirl and spin and turn.  
They lift things off the ground.  
Now make your own tornado—  
You won't get tossed around!

# TWIST AND SPOUT

What You'll Need:

- 2 clear plastic soda bottles that are the same size
- tape
- water

**1.** Fill one of the bottles two-thirds full with water.

**2.** Tape the two bottles together tightly. Check for leaks.

**3.** Turn the bottles over and swirl the top bottle.

**4.** What do you see in the bottle?
