The 2022 Diversity, Equity, Inclusion, and Respect (DEIR) Educational Resource Guide contains a non-exhaustive list of resources meant to provide further enrichment and education on common DEIR topics and terms. It is meant as a starting point for those interested in learning more about DEIR issues. The terms included in this guide are listed in alphabetical order, not in order of relevance or importance.

We will update this document twice a year to ensure it remains up-to-date and relevant. Some of the terms may have more resources than others as it depends on how much content there is related to the topic. If you have any suggestions about related content you would like to see included in future iterations, please send your suggestions to diversity@acs.org.

The external links provided in this document are for informational purposes only and they do not constitute an endorsement by the American Chemical Society (ACS). Some of the references may contain material or language that some people may find offensive. The views and opinions expressed in any referenced document do not necessarily state or reflect those of the ACS.
What is Diversity, Equity, Inclusion, and Respect (DEIR)?

*Below is how ACS defines these terms.*

**Adapted from definitions from the Ford Foundation Center for Social Justice**

**Diversity**
The representation of varied identities and differences (race, ethnicity, gender, disability, sexual orientation, gender identity, national origin, tribe, caste, socio-economic status, thinking and communication styles, etc.), collectively and as individuals. ACS seeks to proactively engage, understand, and draw on a variety of perspectives.

**Equity**
Seeks to ensure fair treatment, equality of opportunity, and fairness in access to information and resources for all. We believe this is only possible in an environment built on respect and dignity. Equity requires the identification and elimination of barriers that have prevented the full participation of some groups.

**Inclusion**
Builds a culture of belonging by actively inviting the contribution and participation of all people. Every person’s voice adds value, and ACS strives to create balance in the face of power differences. In addition, no one person can or should be called upon to represent an entire community.

**Respect**
Ensures that each person is treated with professionalism, integrity, and ethics underpinning all interpersonal interactions.
Allyship

Allyship is an act of trust, support, active listening, and other processes to help groups and individuals unfairly marginalized. In the context of the workplace, an ally is a person who works to facilitate the development of, and to improve the experience of all employees, in particular, those who are underrepresented or in groups that are marginalized (IBIS Consulting Group).

Race and Racism

Race refers to any one of the groups that humans are often divided into based on physical traits regarded as common among people of shared ancestry. Racism is a belief that race is a fundamental determinant of human traits and capacities and that racial differences produce an inherent superiority of a particular race.

Unconscious Bias

Unconscious biases are social stereotypes about certain groups of people that individuals form outside their own conscious awareness. Everyone holds unconscious beliefs about various social and identity groups, and these biases stem from one’s tendency to organize social worlds by categorizing.
