Welcome!

**DEIR Learning Essentials** offers a comprehensive array of materials designed to enhance your understanding and encourage meaningful discussions on Diversity, Equity, Inclusion (DEI) topics and terms.

Our aim is to provide you with up-to-date and relevant information, ensuring you have access to the latest insights and best practices in DEI. We regularly update these resources to reflect new developments and emerging trends.

If you have any ideas or suggestions for content you'd like to see included in the future, please don't hesitate to contact the ACS Office of Diversity, Equity, Inclusion and Respect (DEIR). Your feedback is invaluable in helping us create a resource that meets your needs and fosters a more inclusive environment for everyone.
Content Disclaimer

The external links included in this document are provided solely for informational purposes and do not imply any endorsement by the American Chemical Society (ACS). Please be aware that some of the references and internal links may contain content or language that could be considered sensitive or challenging to some audiences.
Accessibility

Accessibility refers to the design of physical and digital environments that ensures everyone regardless of disabilities or abilities can access information, products, services, and environments in a way that is inclusive and equal.

Allyship

Allyship is the practice of using one’s privilege and influence to support and advocate for marginalized groups. It involves recognizing systemic inequalities, actively working to dismantle them, and amplifying the voices of those facing discrimination. Allyship is not a self-designated title but is earned through consistent, genuine efforts and recognized by the marginalized communities.

Disability Inclusion in STEM

A disability is any condition of body or mind (impairment) that makes it more difficult for the person with the condition to do certain activities (activity limitation) and interact with the world around them (participation restrictions).

Gender Equity in STEM

Gender equity in STEM (Science, Technology, Engineering, and Mathematics) refers to the fair treatment, access, opportunity, and advancement for all genders within these fields. It involves identifying and eliminating biases, barriers, and disparities that have historically disadvantaged women and non-binary individuals in STEM disciplines.

Generations in the Workplace

Generations in the workplace refer to cohorts of employees distinguished by their birth years, each with unique characteristics, values, and work styles. There are currently 5 generations in the workplace. Understanding generational differences can help improve workplace communication, collaboration, and management strategies.

Neurodiversity describes the idea that people experience and interact with the world around them in many different ways; there is no one 'right' way of thinking, learning, and behaving, and differences are not viewed as deficits.

(Source: Harvard Medical School)
Racial and Ethnic Disparities

Racial and ethnic disparities refer to the unequal outcomes and opportunities experienced by individuals based on their racial or ethnic backgrounds. These disparities can manifest in various domains of life.

Veteran Inclusion in STEM

**Veteran inclusion** refers to the intentional efforts to integrate military veterans into various aspects of civilian life, particularly within the workforce, educational institutions, and community settings. It involves creating supportive environments that recognize and value the unique skills, experiences, and perspectives that veterans bring.
