"Only when you know the hazards, can you take the necessary precautionary measures."

### n-Hexane

**C₆H₁₄**  
**CAS No.: 110-54-3**

**Synonyms:** hexane, normal-hexane, hexyl hydride

#### Physical Properties

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colorless volatile liquid, mild odor at concentrations &gt;130 ppm</td>
<td></td>
</tr>
<tr>
<td>Vapor pressure at 20 °C</td>
<td>approx 124 Torr</td>
</tr>
<tr>
<td>Melting point</td>
<td>approx –95 °C</td>
</tr>
<tr>
<td>Boiling point</td>
<td>approx 69 °C</td>
</tr>
</tbody>
</table>

#### Exposure Limits

<table>

<td>No</td>
<td>No</td>
<td>No</td>
<td>Oxidizing agents*</td>
</tr>
</tbody>
</table>

*Reaction with:* Oxidizing agents can start fires.

Cited as known to be or reasonably anticipated to be carcinogenic in NTP-9? No

Reproductive toxin? Frazier and Hage describe rat pups that “weighed less than expected” when dams were exposed during pregnancy.

**Typical symptoms of acute exposures:**

- Irritation of the eyes, nose; light-headedness, dizziness, nausea, headache; numbness in the hands, fingers, feet, toes; muscle weakness; dermatitis; giddiness.
- Chemical pneumonia if swallowed and then vomited.

**Principal target organ(s) or system(s):**

- Eyes, skin, respiratory system, central nervous system, peripheral nervous system.

#### Storage Requirements

Store with other flammables in a cool, dry, well-ventilated location, away from ignition sources and separated from oxidizing agents.

#### Additional Remarks

Commercial hexane (mixtures of hexane isomers) usually contains from 20% to 80% n-hexane. Repeated overexposure to n-hexane vapors causes peripheral polyneuropathy (unpleasantly frequent tingling sensations in hands, fingers, feet, and/or toes). The vapor is heavier than air and can travel long distances; it is explosive when mixed with air.

**Notes**

ReadMe

This Chemical Laboratory Information Profile is *not* a Material Safety Data Sheet. It is a brief summary for teachers and their students that describes some of the hazards of this chemical as it is typically used in laboratories. On the basis of your knowledge of these hazards and before using or handling this chemical, you need to select the precautions and first-aid procedures to be followed. For that information and for other useful information, refer to Material Safety Data Sheets, container labels, and references in the scientific literature that pertain to this chemical.

**Reproductive Toxins**

Some substances that in fact are reproductive toxins are not yet recognized as such. For the best readily available and up-to-date information, refer to “DART/ETIC”. See the TOXNET home page at [www.sis.nlm.nih.gov](http://www.sis.nlm.nih.gov) and click on “Toxicology search”. Note that some of the data in DART/ETIC have not been peer-reviewed. See also Linda M. Frazier and Marvin L. Hage, *Reproductive Hazards of the Workplace*, Wiley, 1998; and T. H. Shepard, *Catalog of Teratogenic Agents*, 9th ed.; Johns Hopkins University Press, 1998.

**Abbreviations**

- ACGIH TLV—American Conference of Governmental Industrial Hygienists—Threshold Limit Value.
- C—Ceiling.
- CAS—Chemical Abstracts Service.
- mg/m³—milligrams per cubic meter.
- NA—Not applicable.
- NE—Not established.
- NI—No information.
- NTP-9—National Toxicology Program, Ninth Annual Report on Carcinogens.
- OSHA PEL—Occupational Safety and Health Administration—Permissible Exposure Limit.
- ppm—parts per million.
- STEL/C—Short-term exposure limit and ceiling.
