Nomenclature Generation Programs

Accelrys

NameBatch (http://www.acdlabs.com/products/name_lab/batch.html)
Options include IUPAC, Index, SMILES, and InCHI™

Advanced Chemistry Development Inc. (ACD)

ChemSketch (http://www.acdlabs.com/download/)
Free on CD can be used indefinitely to name structures up to 50 non-H atoms.
References parts of IUPAC documents used to generate name.

CambridgeSoft Corp.

ChemULTRA (http://www.cambridgesoft.com/)
CD has 2-week free use

Elsevier / Beilstein

Autonom (http://www.mimas.ac.uk/crossfire/autonom.html)

OpenEye

LexiChem (http://www.eyesopen.com/products/toolkits/lexichem-tk_ogham-tk.html)
MAC - free to academics only as part of a suite of programs.
