REPORT of
CHEMISTS' SALARIES
and EMPLOYMENT STATUS

Based on the 1975 Salary
and Employment Status Survey
of ACS Members

Office of Manpower Studies
American Chemical Society
Washington, D.C.

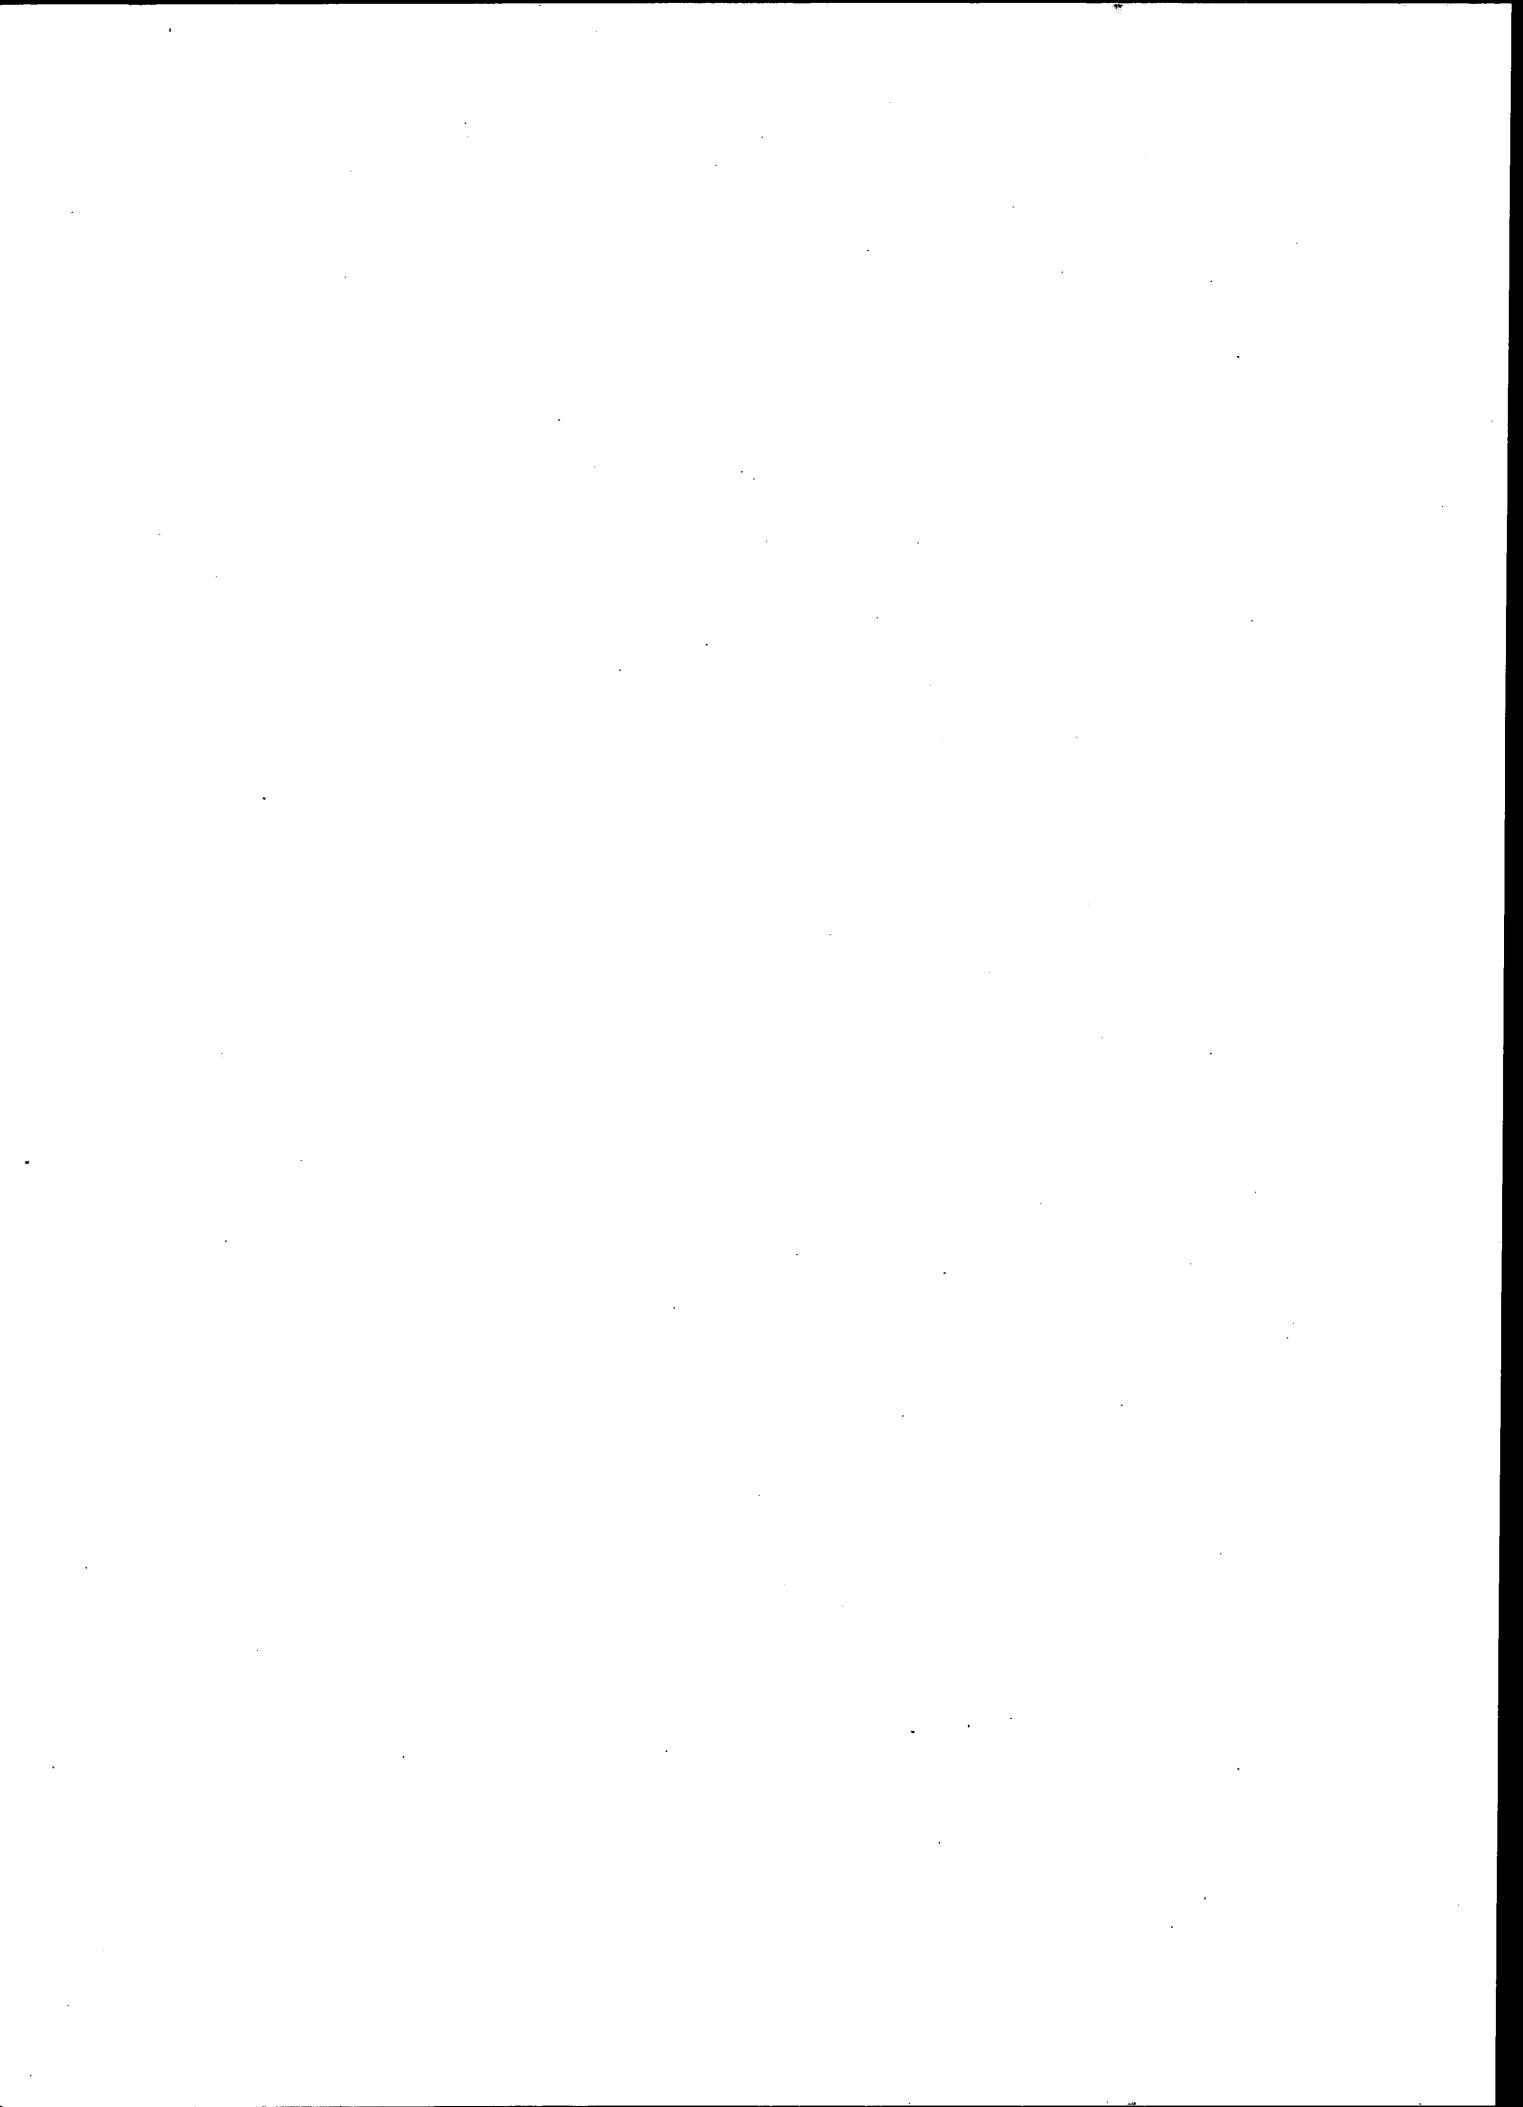

**1975 REPORT
OF CHEMISTS' SALARIES
AND EMPLOYMENT STATUS**

This report has been prepared as a service of the
Department of Professional Relations and Manpower
Studies, American Chemical Society.

American Chemical Society
1155 Sixteenth Street, N.W.
Washington, D. C. 20036

September, 1975

PREFACE

The annual comprehensive survey of the members of the American Chemical Society was initiated in 1941. Although its content and coverage are subject to modification over time as new questions of importance to the members arise, a constant (and largely successful) effort is maintained to keep the survey questionnaire (and the results) comparable from year to year.

The 1975 survey was carried out and the report was completed by the staff of the Office of Manpower Studies in the Department of Professional Relations and Manpower Studies of the ACS. The work was done under the auspices of the ACS Council Committee on Economic Status, chaired by Dr. Madeleine M. Joullie, and that Committee's Subcommittee on Surveys, headed by Dr. Alan L. McClelland. Responsible for the survey and the report are Dr. Panagis A. Benetatos, and Ms. Maria Frizat, who were assisted by Ms. Connie Bledsoe. Computer programming and production were handled by Mr. Dennis Larson, Programmer, and Frank Ford, Production Manager for the ACS systems.

INTRODUCTORY REMARKS

The 1975 survey questionnaires were mailed in late February to approximately 18,800 male members (1/4 of the domestic ACS membership, excluding members with student or emeritus status and those over 64 years of age) and to approximately 6,300 female members (100% of the domestic employable membership). By the end of April, some 13,700 had been returned (54.6% response).

For the purpose of this report, only 1/4 of the female responses were used to obtain correct weighting and comparability with previous years. A more detailed analysis of salaries and employment of women is being prepared by this office.

As in previous years, only the salaries and incomes reported by those employed full-time were used for the calculations. We have included some special tables describing the economic status of the responding members who hold postdoctoral appointments, also of those who classified their full-time employment as subprofessional, and those self-employed.

Separate analyses were done, as usual, for chemists and chemical engineers. All of the tables present the data by degree level and most of them by years of experience.

This year we include arithmetic means as well as the medians, in order to enhance the descriptive value of the report while maintaining continuity and comparability of the results with those of previous years.

We have prepared two sets of salary and income tables. The first set (Tables I-1 through I-9) is similar in content to the ones published in previous years. The second set (Tables II-1 through II-10) is based on a stricter definition of chemists and chemical engineers (see Technical Notes for definitions).

TECHNICAL NOTES

General Remarks

The ACS membership includes certain professionals who are neither chemists nor chemical engineers. For the purposes of this report, operational definitions had to be given, as described below. The many terms used in this survey are not always well defined. We urge the reader to make frequent references to the survey questionnaire (page 61). In what follows we will define and interpret the most important terms. Several individuals have requested clarifications, and we have tried to satisfy here the requests that are likely to be of general interest.

Definitions

All tables refer to salaries or incomes of chemists or chemical engineers employed full-time. Thus, the salaries of the postdoctoral fellows, the part-time or temporarily employed, and the retired have not been included in the calculations from which the tables were derived. We defined the chemists as follows: All those declaring a chemical work specialty are included. Also included as chemists are those who declare a nonchemical work specialty, but declare a chemical specialty in their highest degree. Thus, the members who declare a nonchemical specialty (e.g., managers and administrators) are included if their highest degree was in chemistry. But certain members who have enough chemistry courses to qualify for membership (such as M.D.'s) but neither have a degree in chemistry nor do they declare a chemical work specialty, are excluded. Biochemistry is considered a chemical specialty.

The chemical engineers are those who declare chemical engineering as their work specialty and those who do not declare a chemical specialty but have earned their highest degree in chemical engineering.

This report presents basic yearly salaries of the respondents at the time of the response, which is early spring, 1975. However, the teachers report basic salary presumably for the academic rather than the calendar year. Also, the self-employed usually report income or a combination of an imputed salary plus or minus earnings. Separate tables have been computed for the numbers in these two groups.

Abbreviations and Symbols

- na = not available
- AM = arithmetic mean
- SD = standard deviation
- # = number of respondents

SELECTED CHARACTERISTICS OF THE SURVEY RESPONDENTS

We present in summary form some characteristics of the respondents, and when feasible we make comparisons with the characteristics of the ACS domestic membership. Strict comparison is not possible because some categories have not been included in the sample.

Table 1
PERCENTAGE DISTRIBUTION BY SEX
of Respondents and ACS Members

	<u>Survey Respondents</u>	<u>ACS Domestic Members</u>
Men	92.0	91.7
Women	<u>8.0</u>	<u>8.3</u>
Total	100.0	100.0

The sex distributions (Table 1) are very similar while slight discrepancies are present in the age distribution (Table 2). The first two age brackets are underrepresented in the survey, and this is probably due to the intentional exclusion of student members from the survey.

Table 2
PERCENTAGE DISTRIBUTION BY AGE
of Respondents and ACS Members

<u>Age Bracket</u>	<u>Survey Respondents</u>	<u>ACS Domestic Members</u>
20-24	1.1	2.3
25-29	7.4	10.0
30-34	17.0	15.1
35-39	15.2	14.0
40-44	12.8	12.2
45-49	14.1	13.6
50-54	13.3	13.6
55-59	11.9	11.4
60-64	<u>7.2</u>	<u>7.7</u>
Total	100.0	100.0

The discrepancies in the distributions by degree level are very large. The degree distribution of the membership obtained from the records understates the higher degrees. Many records contain the degree information at the time of the member's application, and the update of the files, when done, involves some time lag.

Table 3
PERCENTAGE DISTRIBUTION BY DEGREE LEVEL
of Respondents and ACS Members

<u>Degree Level</u>	<u>Survey Respondents</u>	<u>ACS Domestic Members</u>
Less than B.S.	.5	.2
B.S. or B.A.	28.4	35.8
M.S. or M.A.	19.8	17.0
Doctor's	51.3	40.4
Other Degree	<u>na</u>	<u>6.6</u>
Total	100.0	100.0

na = not applicable

Another source of discrepancy is the "other degree" category in the ACS records. We assume that most of those are advanced degrees such as M.D.'s and J.D.'s. These are lumped together with the Ph.D.'s in this survey while they constitute a distinct group in the membership record.¹ An alternative explanation offered for the large number of Ph.D.'s among the respondents is that they respond to questionnaires at a higher rate than the bachelor's. There is no quantitative evidence to substantiate this argument, but in view of the persistence of this phenomenon over the years, it may have some merit.

The distribution of the respondents by region is consistent with that of the membership, except for the Middle Atlantic region which is underrepresented in the survey responses. There is no explanation available for this discrepancy.

¹One of the purposes of the strict definition of chemists and chemical engineers used for the construction of the salary tables was to avoid possibly distorting the figures by including nonchemists' (such as M.D.'s) salaries.

Table 4

PERCENTAGE DISTRIBUTION BY GEOGRAPHIC REGION OF RESIDENCE
of Respondents and ACS Members

<u>Geographic Region¹</u>	<u>Survey Respondents</u>	<u>ACS Domestic Members</u>
Pacific	10.8	10.9
Mountain	3.5	3.3
West North Central	6.2	5.3
West South Central	7.5	7.0
East North Central	22.2	20.2
East South Central	3.8	3.6
Middle Atlantic	21.7	26.5
South Atlantic	17.0	15.8
New England	<u>7.3</u>	<u>7.5</u>
Total	100.0	100.0

The distribution of the respondents by employer cannot be easily compared with the membership record. It simply assures us that no great distortion has occurred in this respect. The membership record shows a higher concentration in the educational institutions than the survey because student members were excluded from the survey.

Table 5

PERCENTAGE DISTRIBUTION BY EMPLOYER CATEGORY
of Respondents and ACS Members

<u>Employer Category</u>	<u>Survey Respondents</u>	<u>ACS Domestic Members</u>
Manufacturing industry	53.1	54.4
Non-manufacturing industry	7.3	7.5
College, university	20.8	
High school, other school	1.2	28.0
Federal government	8.8	
State, local government	2.7	9.9
Self-employed	1.2	na
Hospital, laboratory	1.7	na
Other non-profit organization	3.0	na
Other	<u>0.2</u>	<u>0.2</u>
Total	100.0	100.0

na = not applicable. These categories are probably dispersed among the four categories covered in the ACS membership record.

¹See page 60 for states/regions distribution.

The tables that follow are presented in order to give a more detailed profile of the respondents. The membership record, unfortunately, does not contain comparable information.

Total	218	100.0

SUMMARY OF RESULTS

Employment Status

There has been little change in the employment status of ACS members between March 1, 1974 and March 1, 1975. The unemployment rate for 1975 is 1.6% compared with 1.4% in 1974. The percentage of those subprofessionally employed had a more substantial increase, from 1.0% in 1974 to 2.2% in 1975. We believe this was due more to the prominent place this category had in this year's questionnaire than to an actual increase in the number of those subprofessionally employed.

Table 11

EMPLOYMENT STATUS OF RESPONDENTS: 1971-1975

(Percentages)

<u>Employment Category</u>	<u>1971</u>	<u>1972</u>	<u>1973</u>	<u>1974</u>	<u>1975</u>
Full-time Employed	88.2	88.0	88.7	92.5	91.0
Subprofessionally Employed	2.5	2.8	2.0	1.0	2.2
Part-time or Temporarily Employed	2.3	1.5	1.3	1.0	1.3
Postdoctoral or Other Fellowship	1.6	2.0	2.9	2.4	2.0
Unemployed Seeking Employment	2.8	3.1	1.7	1.4	1.6
Retired Seeking Employment	2.6	0.4	0.4	0.3	0.4
Not Seeking Employment ¹		2.2	3.0	1.4	1.4

¹In 1974 and 1975 members over 64 years of age were not surveyed.

Members were asked whether or not they were unemployed and seeking employment at any time during the period March 1, 1974 to March 1, 1975. 4.8% of all respondents indicated some unemployment during this period.

Economic Status

Members were asked to state their present basic salary associated with their principal professional employment, excluding bonuses, overtime, summer teaching, or other payment for professional work. They were also asked to report their 1974 gross annual income from all professional activities. This is a departure from previous

years when members were asked to estimate their current year's income. With this year's change, it was verified that, as it might have been expected, the estimates given in 1974 deviated substantially from the actual 1974 incomes reported in 1975.

Table 12

1974 OVERALL MEDIAN INCOME OF CHEMISTS

(Estimated and Actual)

<u>Degree Level</u>	<u>Estimated</u> ¹	<u>Actual</u> ²	<u>Difference</u>
B.S.	\$18.0	\$19.0	5.6%
M.S.	19.0	19.9	4.7
Doctor's	22.5	23.0	2.2

¹Estimated in 1974.

²Reported in 1975.

Table 13

1974 OVERALL MEDIAN INCOME OF CHEMICAL ENGINEERS

(Estimated and Actual)

<u>Degree Level</u>	<u>Estimated</u> ¹	<u>Actual</u> ²	<u>Difference</u>
B.S.	\$22.0	\$24.5	11.4%
M.S.	23.3	25.0	7.3
Doctor's	26.0	27.0	3.8

¹Estimated in 1974.

²Reported in 1975.

Salaries of chemists increased 7.1% from 1974, which represents a greater increase than the 5.2% from 1973 to 1974.

Chemical engineers did better. This year's increase was 10% compared with only 4.9% the previous year.

Among both groups, the chemists and the chemical engineers, those with a B.S. degree got substantially higher pay raises than those with the Ph.D.

TABLE I-3
YEARLY SALARIES OF FULL-TIME EMPLOYED CHEMISTS
by Degree Level and Employer: 1975

Employer Category	Degree Level		
	B.S.	M.S.	Doctor's
1. Industry			
Median	19,400	20,800	25,300
Arithmetic Mean	20,479	22,414	27,092
Number	1,995	1,144	2,357
a. Manufacturing Industry			
Arithmetic Mean	20,683	22,643	27,314
Number	1,771	1,025	2,077
b. Non-manufacturing Industry	18,870	20,442	25,448
Arithmetic Mean	18,870	20,442	25,448
Number	224	119	280
2. Education			
Median	11,900	14,100	18,000
Arithmetic Mean	13,263	14,670	19,536
Number	68	260	1,728
a. College/University			
Arithmetic Mean	14,078	14,971	19,584
Number	46	173	1,715
b. High School/Other School			
Arithmetic Mean	11,559	14,074	13,238
Number	22	87	13
3. Government			
Median	19,100	20,100	24,700
Arithmetic Mean	19,092	21,159	25,072
Number	327	234	535
a. Federal Government			
Arithmetic Mean	20,637	22,751	26,032
Number	229	175	419
b. State/Local Government			
Arithmetic Mean	15,483	16,439	21,608
Number	98	59	116
4. Hospital/Independent Lab. Non-profit Organization			
Median	14,000	15,450	21,900
Arithmetic Mean	14,750	17,961	23,699
Number	99	78	245
a. Hospital/Independent Lab.			
Arithmetic Mean	13,572	16,507	23,655
Number	43	28	86
b. Non-profit Organization			
Arithmetic Mean	15,655	18,776	23,723
Number	56	50	159
5. Self-employed			
Median	22,500	22,650	25,500
Arithmetic Mean	26,579	21,804	30,042
Number	28	24	38
6. Other			
Median	15,000	18,400	15,300
Arithmetic Mean	13,533	15,600	17,940
Number	9	5	5

TABLE I-4

¹ Excluded from this table are 4 postdoctorals working in private industry and 1 in state or local government.

1. Pacific

Washington
Oregon
California
Alaska
Hawaii

2. Mountain

Montana
Idaho
Wyoming
Nevada
Utah
Colorado
Arizona
New Mexico

3. West North Central

North Dakota
Minnesota
South Dakota
Iowa
Nebraska
Kansas
Missouri

4. West South Central

Oklahoma
Arkansas
Texas
Louisiana

5. East North Central

Wisconsin
Michigan
Illinois
Indiana
Ohio

6. East South Central

Kentucky
Tennessee
Mississippi
Alabama

7. Middle Atlantic

New York
Pennsylvania
New Jersey

8. South Atlantic

Delaware
Maryland
West Virginia
District of Columbia
Virginia
North Carolina
South Carolina
Georgia
Florida

9. New England

Maine
New Hampshire
Vermont
Massachusetts
Connecticut
Rhode Island

AMERICAN CHEMICAL SOCIETY
1975 Comprehensive Salary and Employment Status Survey

Do not write
in this space

A. Sex: (1) Male (2) Female 2-3 B. Year of birth _____ 4-5 C. State of residence _____

1 2 3 4 5

6

D. Citizenship: (1) U.S. Non-U.S.: (2) Permanent resident visa (3) Other visa

E. Are you a member of any of the minority groups recognized by the Equal Employment Opportunity Commission listed below? (1) Yes (2) No

7

If "Yes," please check those which apply to you:

(1) Black/Negro (2) American Indian
(3) Oriental (those of Chinese, Japanese, (4) Spanish-Surnamed (those of Mexican, Puerto Rican, Cuban, or Spanish ancestry)

8

F. Highest degree earned: (1) Bachelors (2) Masters (3) Doctors (4) Less than bachelors

9 10

G. Year highest degree was obtained: _____

H. Field of highest degree:

(01) Analytical chemistry	(07) Agricultural/food chemistry
(02) Inorganic chemistry	(08) Pharmaceutical/medicinal chemistry
(03) Organic chemistry	(09) Chemical engineering
(04) Polymer/macromolecular chemistry	(10) Chemistry, general
(05) Physical/theoretical chemistry	(11) Chemistry, other (specify) _____
(06) Biochemistry	(12) Non-chemical (specify) _____

11 12

Please check the one response in each question which most aptly describes your status as of March 1, 1975.

I. Current Employment Status:

Employed full-time:	Unemployed:
(01) professionally	(06) and seeking employment
(02) subprofessionally	(07) not seeking employment

13 14

Employed part-time or temporarily:	Retired:
(03) and seeking full-time employment	(08) seeking full-time employment
(04) not seeking full-time employment	(09) seeking part-time employment

15 16

(05) Postdoctoral or other fellowship

J. Current, or most recent full-time professional employer:

Private industry or business:	(05) Federal government
(01) manufacturing	(06) State or local government
(02) non-manufacturing	(07) Self-employed
(03) 2 or 4-year college or university	(08) Hospital, independent laboratory
(04) High school or other school	(09) Other non-profit organization
	(10) Other (specify) _____

17 18

K. Category which most closely approximates your present, or most recent principal function:

Research and development	(05) Teaching or teaching/research
(01) Management/administration of R&D	(06) Marketing/sales/purchasing/technical services
(02) Basic research	(07) Production/quality control
(03) Applied research/development	(08) Forensic analysis/other lab. analysis
(04) General management/administration (other than research/development)	(09) Writing, editing, abstracting, programming
	(10) Consulting
	(11) Other (specify) _____

19 20

L. Specialty which is most closely related to your present, or most recent principal employment:

(01) Analytical chemistry	(09) Chemical engineering
(02) Inorganic chemistry	(10) Chemistry, general
(03) Organic chemistry	(11) Chemistry, other (specify) _____
(04) Polymer/macromolecular chemistry	Environmental
(05) Physical/theoretical chemistry	Nuclear
(06) Biochemistry	Computer/literature/information science
(07) Agricultural/food chemistry	(12) Non-chemical (specify) _____
(08) Pharmaceutical/medicinal chemistry	

19 20

M. Present basic annual salary associated with your principal professional employment (nearest \$100): \$ _____
(Do not include bonuses, overtime, summer teaching, or other payment for professional work.)

21 22 23 24 25

26

N. 1974 gross annual income from all professional activities, to the nearest \$100: \$ _____
(Income is ALL payment for professional activities including basic salary, plus bonuses, royalties, fees, honoraria, consultation, etc.)

27 28 29 30

O. How many years of professional work experience, including postdoctoral study, have you had? _____

31 32

P. Have you been unemployed and seeking employment at any time since March 1, 1974? (1) Yes (2) No
(Students, graduate assistants, or postdoctorals are not considered as unemployed for this survey.)

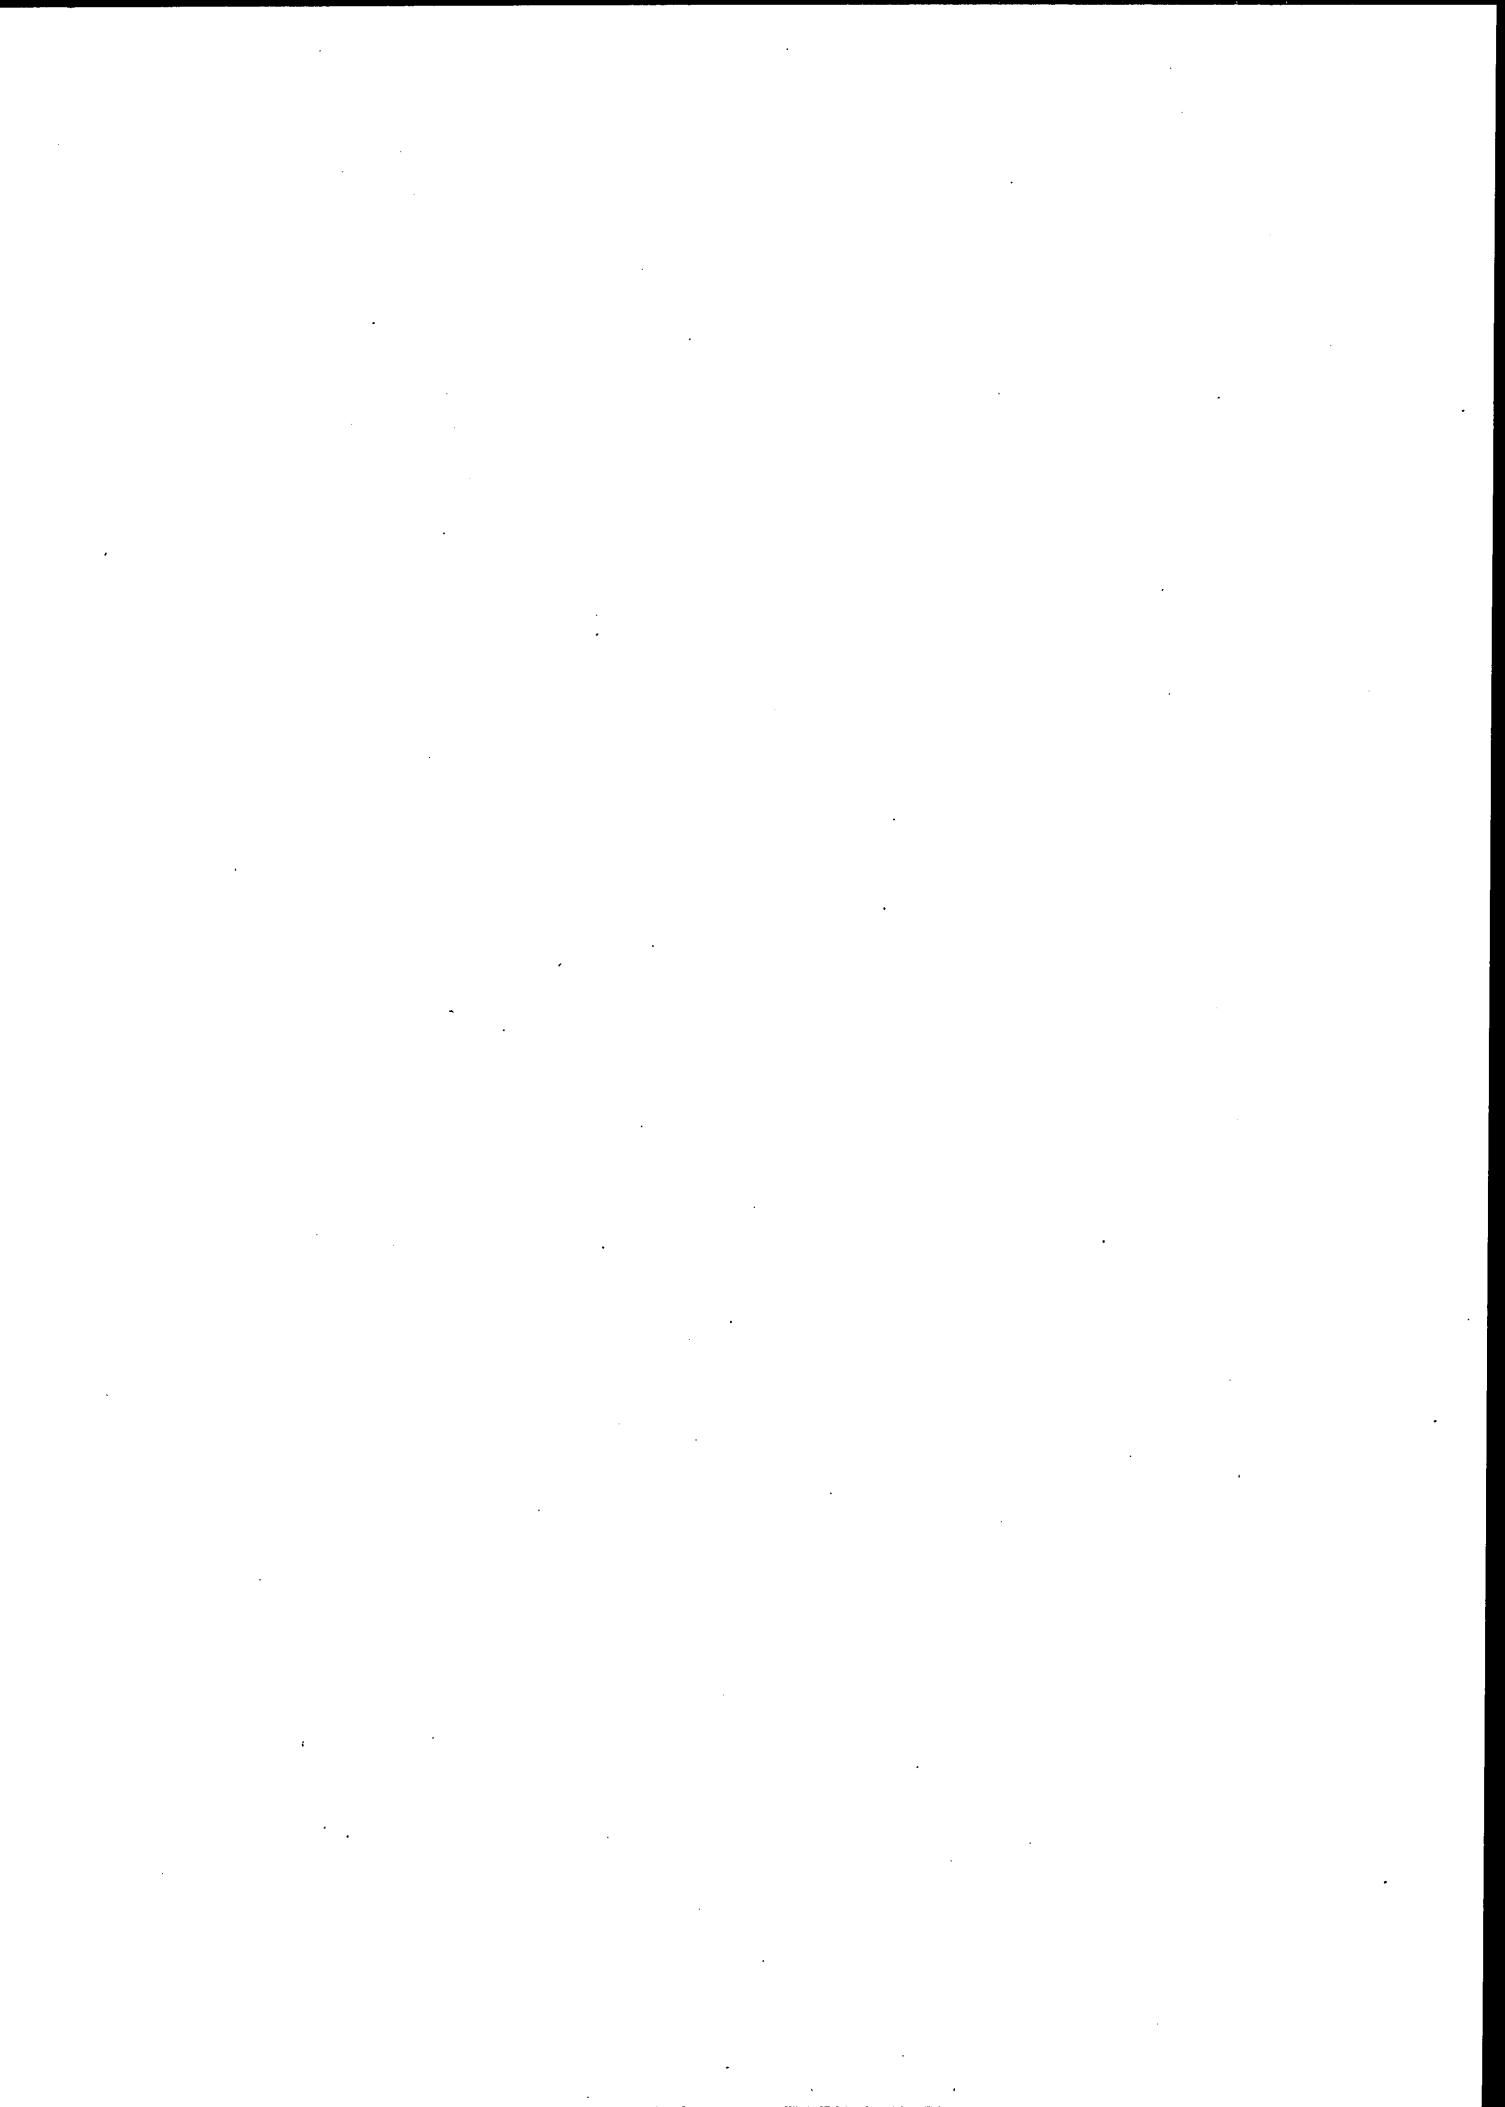

33

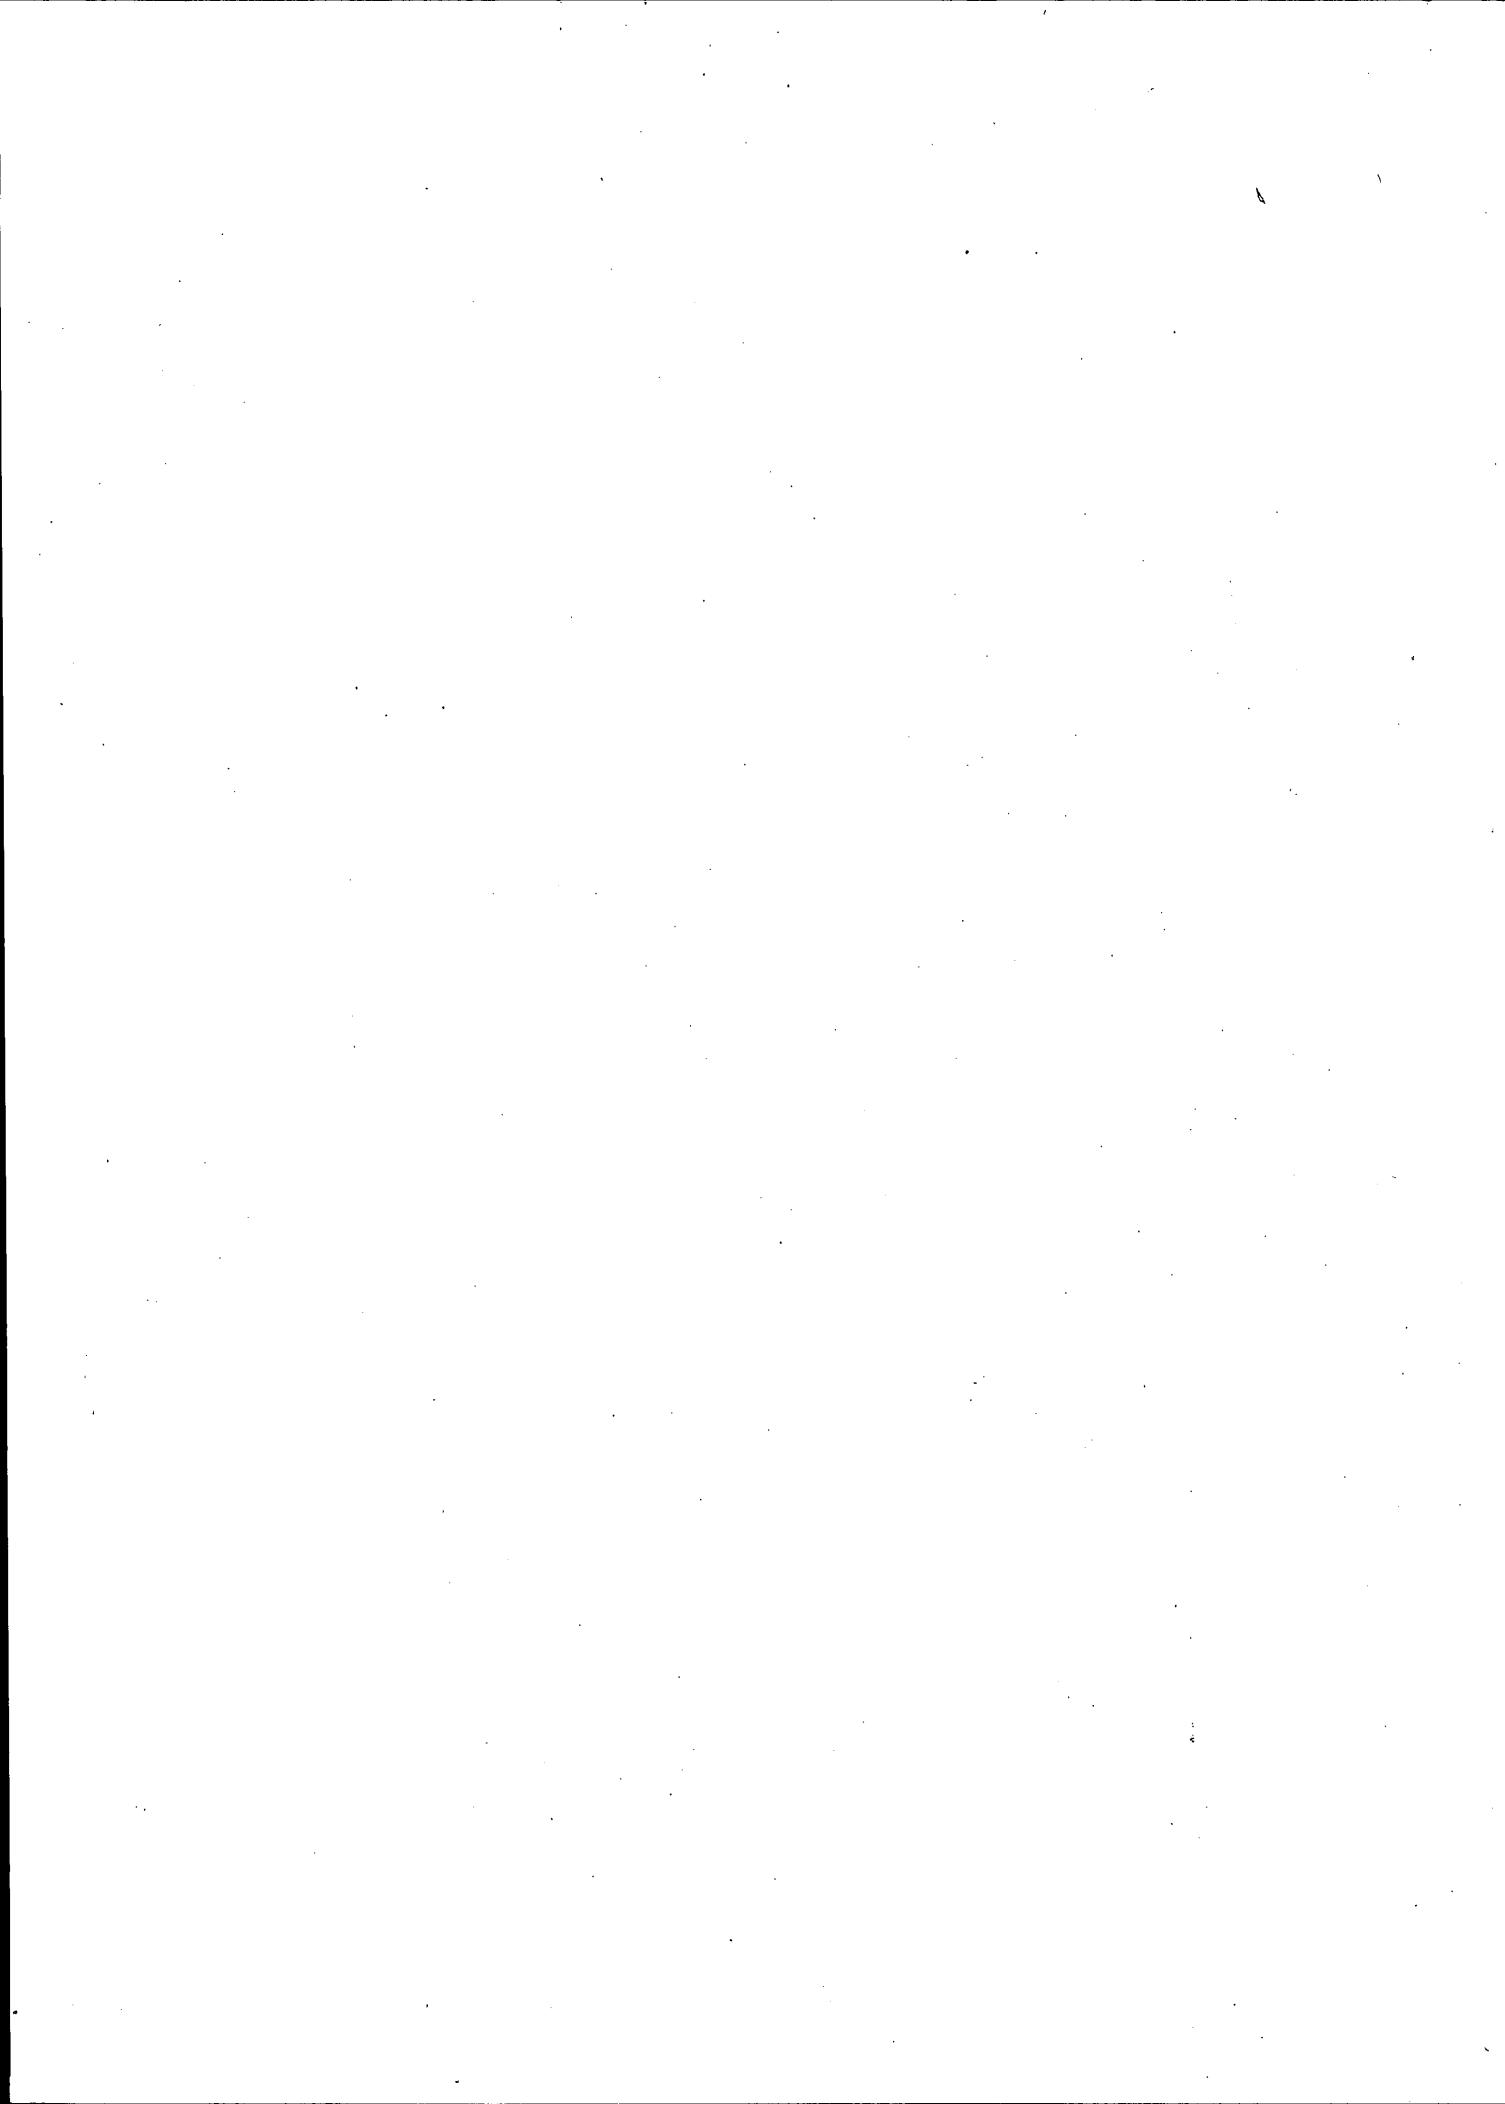

If "Yes," what was the length of unemployment:

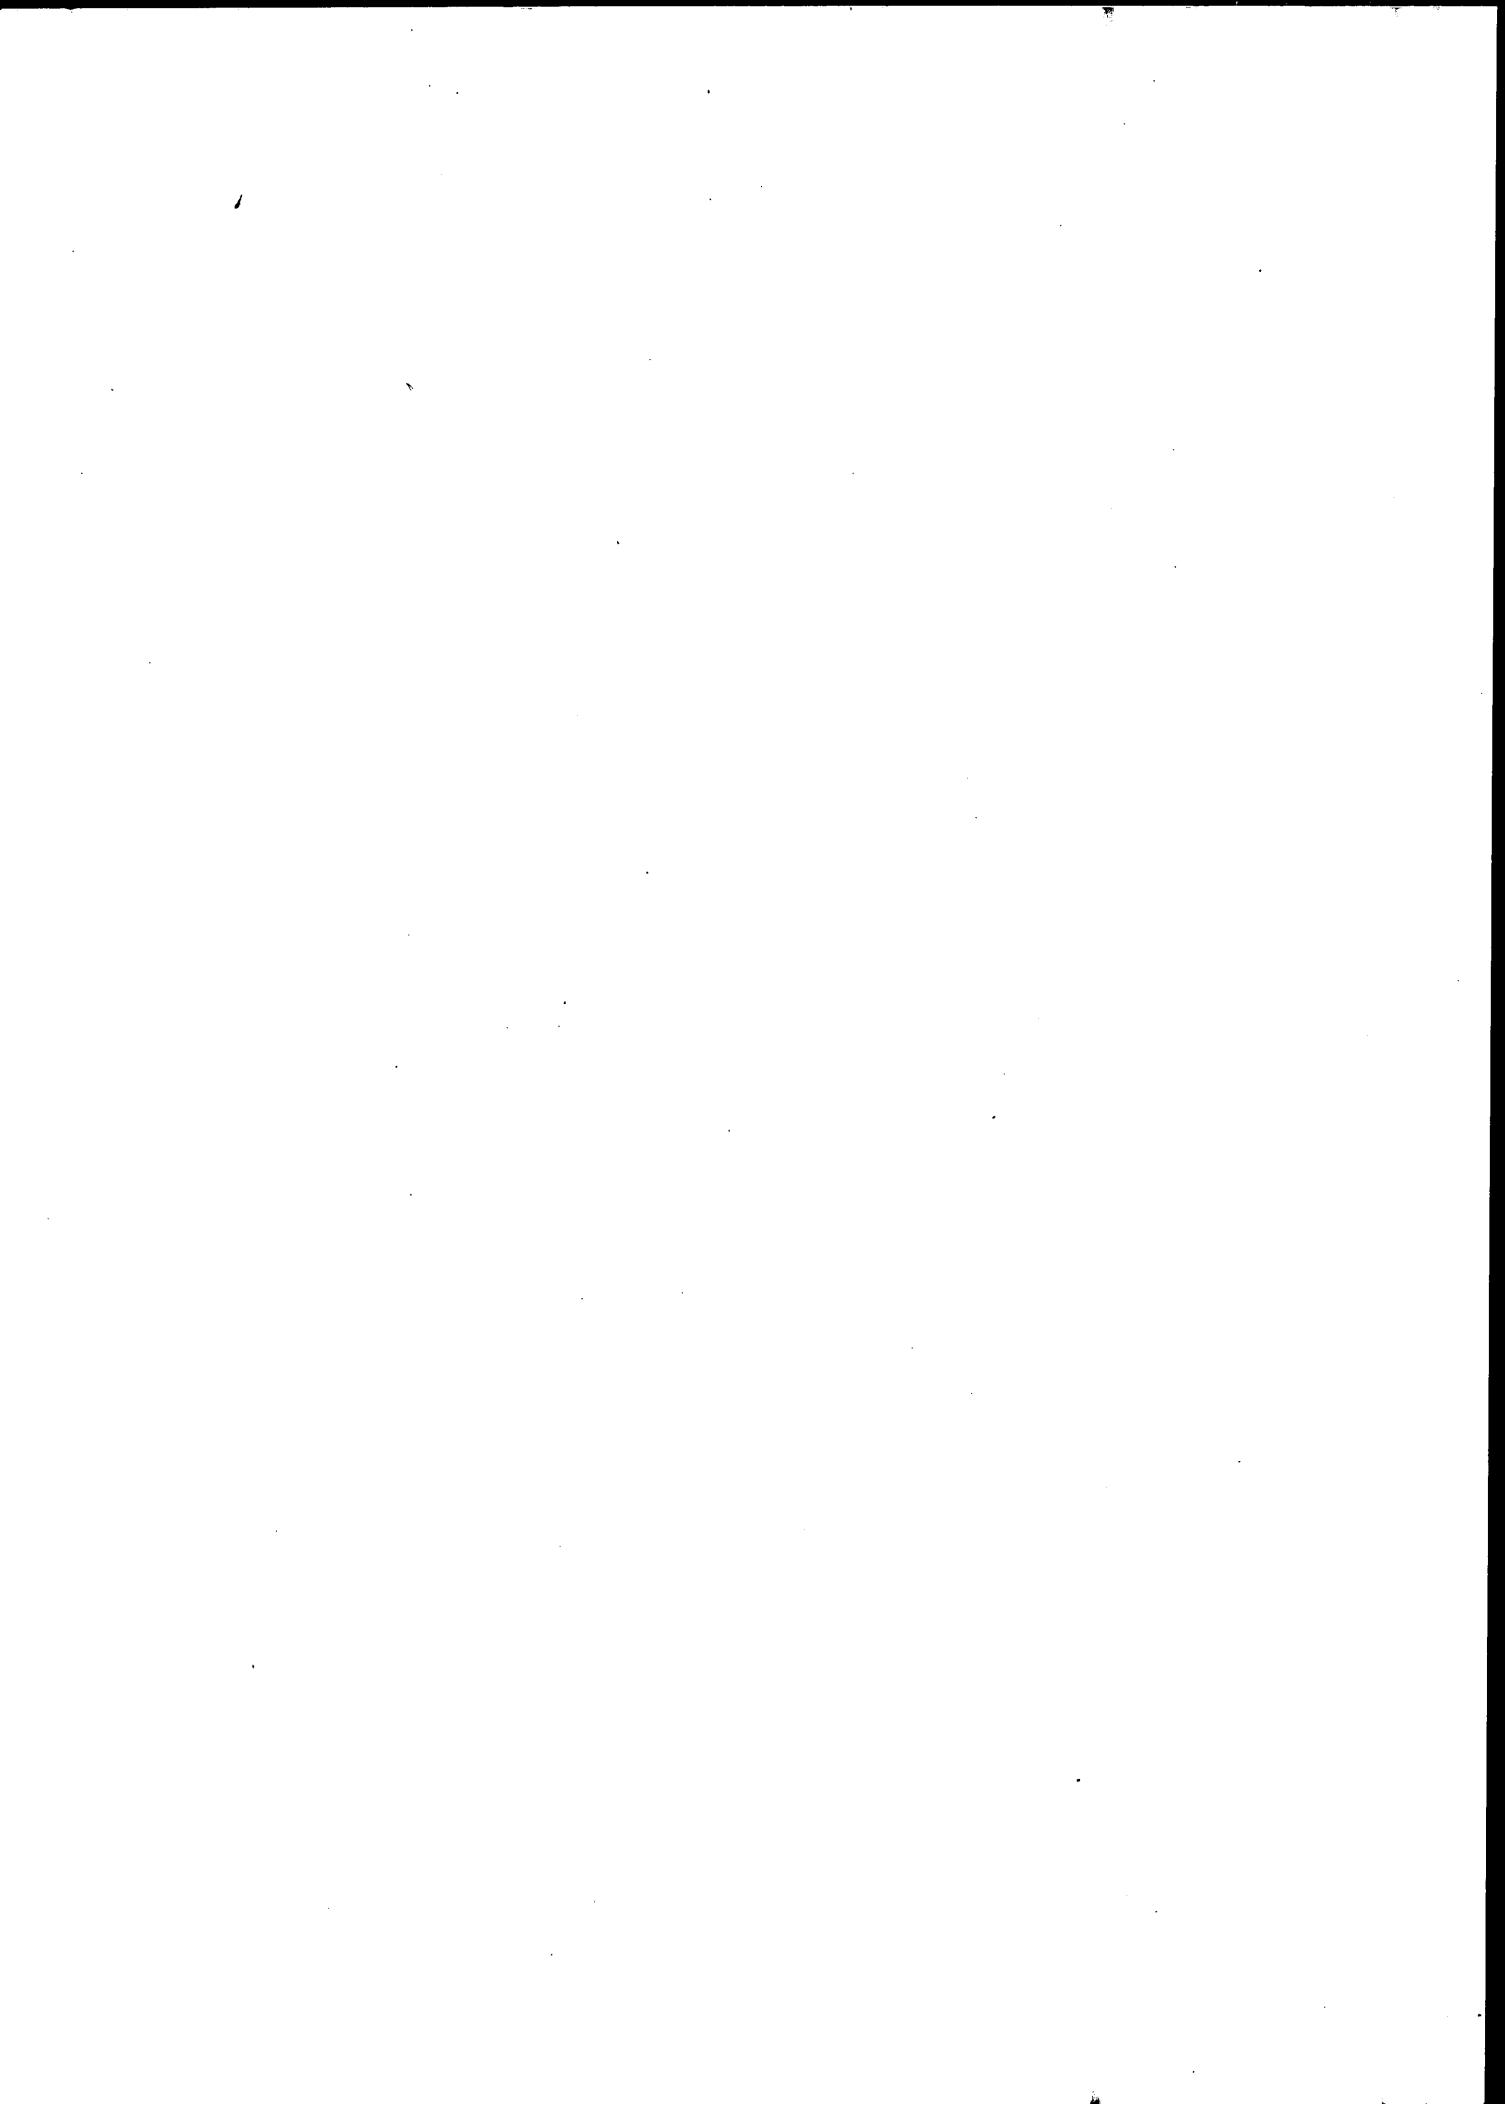

(1) Less than 1 month	(4) 3-6 months
(2) 1-2 months	(5) 6-12 months
(3) 2-3 months	(6) More than 12 months

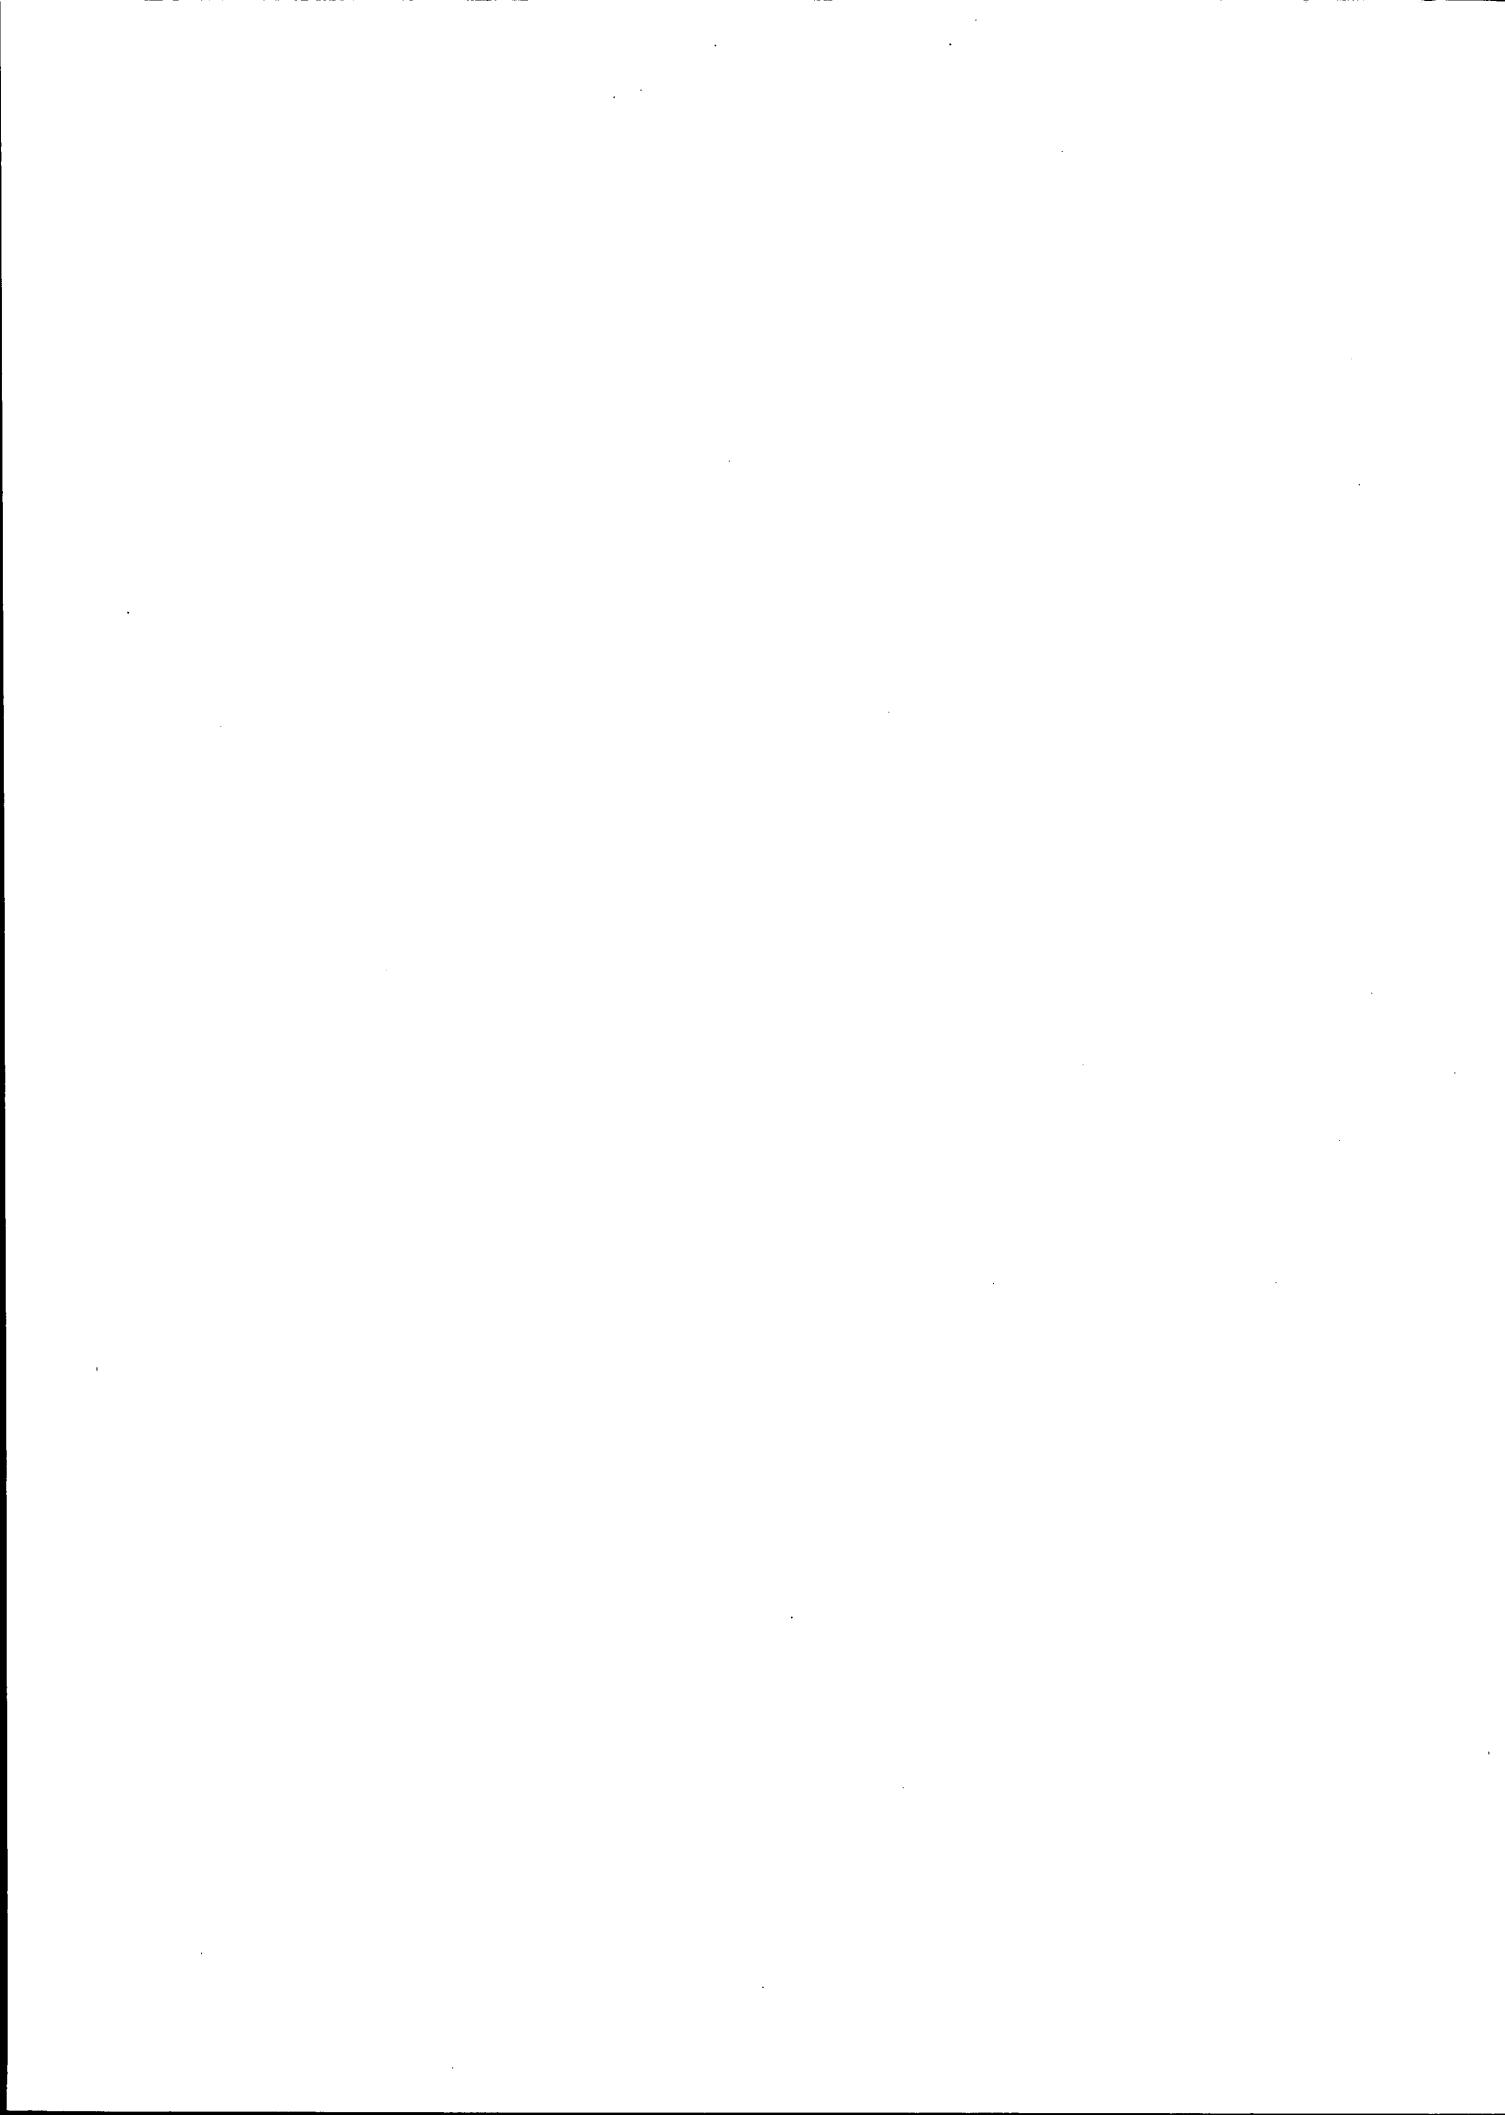

34

(We would appreciate having your opinions, comments, or suggestions on the reverse side of this page.)
