PUBLICATIONS OF ACS STATISTICAL SERVICES

Salaries: ACS Statistical Services annually surveys the ACS membership, gathering detailed information on member chemists and chemical engineers. The reports based on this survey contain statistical tables describing the respondents' employment status, employer, work function and specialty, salary, and demographic characteristics.

Reports are available for each year from 1973.

Starting Salaries: ACS Statistical Services also surveys new graduates in chemistry and chemical engineering each year, and publishes reports detailing the graduates' employment status, post-graduation plans, starting salaries, and other employment and demographic characteristics.

Reports are available for each year from 1975.

Professionals in Chemistry: The Professionals in Chemistry series compiles information concerning chemists and chemical engineers from ACS, government, and private industry sources. It details information on demography, employment, salaries, education, and supply and demand for the entire chemical profession.

Reports for each year from 1975 through 1978. Since 1980, Professionals in Chemistry has been published biennially.

Special Reports:

1975 Report of Chemists' Salaries and Employment Status Supplement: Economic Status of Women in the ACS.

Women Chemists 1980: A supplemental report on the ACS's 1980 Survey of Salaries and Employment.

Women Chemists 1985: A supplemental report on the ACS's 1985 Survey of Salaries and Employment.

1986 SURVEY REPORT

STARTING SALARIES AND EMPLOYMENT STATUS OF CHEMISTRY AND CHEMICAL ENGINEERING GRADUATES

This report was prepared by
ACS Statistical Services

American Chemical Society
1155 Sixteenth Street, N.W.
Washington, D. C. 20036

Available from the Distribution Office, ACS.

CONTENTS

ACKNOWLEDGMENTS

Each year, at the direction of its Joint Board-Council Committee on Economic Status, the American Chemical Society surveys chemistry and chemical engineering graduates to determine trends in starting salaries and employment status. Nguyen Bailey and Joan Burrelli of ACS Statistical Services, managed by John Robert Jones, conducted this year's survey and prepared this report.

Robert K. Neuman, Head
Department of Professional Services

SUMMARY OF FINDINGS

SALARIES

After two years of salary gains, salaries for inexperienced chemists and chemical engineers decreased in both current and constant dollars in 1986. Both chemistry and chemical engineering graduates experienced decreases in average salary for all degree levels, with the exception of PhD chemists. The decrease in starting salaries this year brought the means down to little more than those in 1984: in 1984, the mean salary for inexperienced BS chemists was $18,681; in 1986, it was $18,995.

Table 1 shows average starting salaries paid to inexperienced chemistry graduates for 1985 and 1986, and gives additional information concerning the variation among individual salaries within each group. Table 2 presents corresponding information for chemical engineering graduates.

For inexperienced chemists (those with less than 12 months of experience), 1986 mean starting salaries were:

$18,995 for the BS, down 3.6%, or in constant dollars down 4.8%
$24,065 for the MS, down 9.0%, or in constant dollars down 10.0%
$35,107 for the PhD, up 6.1%, or in constant dollars up 4.8%

Chemical engineers continue to receive larger starting salaries than do chemists with similar degrees. Among chemical engineers, the 1986 mean starting salaries were:

$26,899 for the BS, down 0.7%, or in constant dollars down 1.9%
$29,996 for the MS, down 2.4%, or in constant dollars down 3.6%
$39,485 for the PhD, down 3.7%, or in constant dollars down 4.8%

POST-GRADUATION EMPLOYMENT STATUS

Unemployment rates for chemists and chemical engineers were lower in 1986 than in 1985 for all degree levels. Unemployment rates for MS and PhD graduates are lower than those for BS graduates.

Unemployment of recent BS graduates is less severe in chemistry than it is in chemical engineering, but even in chemistry the problem is worse than the figures in Table 3 seem to indicate. To understand the extent of unemployment among new chemistry graduates requires an additional calculation. Because unemployment is defined as a fraction of the labor force, persons not seeking work are neither employed nor unemployed. An accurate reading of unemployment requires removing those not seeking employment from the denominator of the unemployment rate. Performing the calculation in this way yields larger unemployment rates among recipients of the bachelor's degree: 13% in chemistry and 21% in chemical engineering.

Table 1

STARTING YEARLY SALARIES OF INEXPERIENCED FULL-TIME EMPLOYED CHEMISTRY GRADUATES

by Degree: 1985 and 1986

Salaries	DEGREE LEVEL					
	Bachelor's		Master's		Ph.D.	
	1985	1986	1985	1986	1985	1986
90th Percentile	$24,772	$25,000	$32,100	$32,000	$38,880	$42,000
75th Percentile	22,800	22,250	30,000	28,500	37,725	40,000
50th Percentile	19,500	18,600	27,000	26,100	35,850	38,000
25th Percentile	17,000	15,000	23,500	20,500	30,000	32,000
10th Percentile	14,000	13,000	17,720	15,000	21,300	27,000
Mean	19,708	18,995	26,432	24,065	33,096	35,107
Count	296	175	45	20	92	43

Table 2

STARTING YEARLY SALARIES OF INEXPERIENCED FULL-TIME EMPLOYED CHEMICAL ENGINEERING GRADUATES

by Degree: 1985 and 1986

Salaries	DEGREE LEVEL					
	Bachelor's		Master's		Ph.D.	
	1985	1986	1985	1986	1985	1986
90th Percentile	$30,000	$31,000	$33,532	$36,000	$45,000	$45,500
75th Percentile	29,100	30,000	32,000	33,000	43,000	43,300
50th Percentile	28,020	28,360	31,400	31,000	40,000	41,500
25th Percentile	26,000	24,000	30,000	29,500	39,480	40,000
10th Percentile	22,100	20,000	26,000	22,000	38,000	30,000
Mean	27,099	26,899	30,742	29,996	40,993	39,485
Count	481	460	48	43	47	49
Standard Deviation	3,340	5,369	4,285	7,207	3,101	6,899

The recent history for unemployment calculated in this way is:

	1986	1985	1984	1983	1982	1981
Chemical Engineering	21%	22%	24%	42%	26%	8%
Chemistry	13	23	27	31	21	23

PLANS FOR ADVANCED STUDY and POSTDOCTORAL FELLOWSHIPS

A rough indicator of demand is postdoctoral fellows as a percent of new PhDs. Because some of the new doctoral chemists who accept postdoctoral fellowships would have preferred full-time employment, an increase in the fraction accepting such fellowships indicates insufficient full-time employment. This year, this measure of demand indicates that the climate is substantially less hospitable for both chemistry and chemical engineering graduates than it was last year. Among chemistry graduates, 46.7% accepted postdoctoral positions in 1986 as compared with 30.6% in 1985. Among chemical engineering graduates, 12.8% accepted such positions in 1986 as compared with 5.4% in 1985.

Bachelor's degree recipients' plans for advanced study are little different from those of last year's graduates. The anticipated field of study, however, has shifted somewhat for this year's graduates. Only 41% of BS chemistry graduates this year plan either full-time or part-time study in chemistry as compared to 50% last year. More BS chemistry graduates are choosing medicine, dentistry, or business this year than last. Among BS chemical engineering graduates, more are choosing chemical engineering majors this year than last. A summary of these plans appears in Tables 4 and 5.

CHEMISTRY GRADUATES WHO HAVE COMPLETED ACS APPROVED PROGRAMS

Graduates completing undergraduate chemistry programs approved by the ACS's Committee on Professional Training generally received higher starting salaries than graduates completing non-approved programs (see Table A-9). Among BS chemistry graduates planning full-time advanced study, almost 40% planned to study medicine. More than 70% of those studying medicine were in non-approved programs (see Table C-5). The unemployment rate for graduates of approved programs was somewhat lower (10% versus 18%) than that for graduates of non-approved programs.

CHARACTERISTICS OF DEGREE-GRANTING INSTITUTIONS AND EMPLOYERS

In 1983 and 1984, the Starting Salary Survey attempted to account for the variation in salaries paid to new bachelor's degree recipients, primarily by analyzing salary differences according to characteristics of the degree-granting institutions and size of the employer. The results of these surveys indicate that, generally speaking, graduates receive higher salaries if their degrees are from schools that are large, grant graduate degrees, or are privately controlled, and that chemists and chemical engineers employed by larger firms generally receive higher salaries than those employed by smaller firms.

Table 3

POSTGRADUATION STATUS OF CHEMISTRY AND CHEMICAL ENGINEERING GRADUATES: FALL 1986

Major and Employment Status	Bachelor's	Master's	Doctorates
CHEMISTRY			
Full-time employed:			
In chemistry or chemical engineering	33.9%	42.6%	48.3%
Outside chemistry or chemical engineering	8.3	11.8	2.5
Grad. asst./postdoctoral or other fellowship	26.1	33.8	46.7
Unemployed and seeking full-time employment	10.4	4.4	2.5
Unemployed and not seeking full-time employment	21.2	7.4	0.0
Total	100.0	100.0	100.0
Number of responses	528	68	120
CHEMICAL ENGINEERING			
Full-time employed:			
In chemistry or chemical engineering	42.6	39.6	77.7
Outside chemistry or chemical engineering	19.1	8.3	6.4
Grad. asst./postdoctoral or other fellowship	14.2	38.2	12.8
Unemployed and seeking full-time employment	20.2	9.0	2.1
Unemployed and not seeking full-time employment	3.8	4.9	1.1
Total	100.0	100.0	100.0
Number of responses	936	144	94

Table 4

PLANS FOR FURTHER STUDY OF B.S. CHEMISTRY
AND CHEMICAL ENGINEERING GRADUATES: FALL 1986

Plans	Chemistry	Chemical Engineering
Further studies	58.4%	28.4%
Full-time	(48.6)	(19.2)
Part-time	(9.8)	(9.2)
No plans for further studies	41.5	71.6
Total	100.0	100.0
Number of responses	549	944

Table 5

FIELDS OF STUDY OF B.S. CHEMISTRY AND
CHEMICAL ENGINEERING GRADUATES WHO PLAN FURTHER STUDIES
Fall 1986

Field of Study	Chemistry	Chemical Engineering
FULL-TIME		
Chemistry or biochemistry	43.8%	2.2%
Chemical engineering	0.7	66.1
Medicine or dentistry	40.0	10.0
Business or management	3.0	8.3
All others	12.5	13.4
Total	100.0	100.0
Number of responses	267	180
PART-TIME		
Chemistry or biochemistry	29.6%	4.8%
Chemical engineering	0.0	25.0
Medicine or dentistry	1.9	0.0
Business or management	22.2	39.3
All others	46.3	30.9
Total	100.0	100.0
Number of responses	54	84

A wider range of salaries exists for chemists than for chemical engineers, partly because the type and size of school from which the new BS graduates receive their degrees is more variable for chemists than for chemical engineers. Proportionately more chemists than chemical engineers are clustered at the lower end of the salary range because proportionately more chemists than chemical engineers are employed in firms with less than 500 employees.

These differences ought to be taken into account, along with more obvious ones, when comparing salaries.

SCOPE AND METHOD

OBJECTIVES

The 1986 Starting Salary Survey is the 35th in the series of annual surveys now conducted by Statistical Services of the American Chemical Society. Summaries of the results of these surveys appear annually in the "Employment Outlook" edition of the Chemical and Engineering News. This year preliminary results were published on October 27.

The primary objective of the survey is to gather data on the starting salaries and occupational status of new chemists and chemical engineers who graduated during the 1985-86 academic year. The survey covers bachelor's, master's, and doctoral degree recipients. In addition, the survey provides information on graduates' sex, citizenship, and ethnicity.

METHOD OF COLLECTION AND TIMING OF SURVEY

Chemistry departments approved by the ACS and chemical engineering departments approved by the American Institute of Chemical Engineers and the Engineer's Council for Professional Development provided names and addresses of students that had graduated between September, 1985 and June, 1986. During Fall 1986, ACS Statistical Services mailed questionnaires to those graduates who had U.S. addresses. Summer 1985 graduates were excluded from the mailing because many of them had twelve months of experience by the time the survey was conducted.

EXTENT OF COVERAGE

Survey questionnaires were mailed between September and October to approximately 11,000 graduates. By the cutoff date of December 2, Statistical Services had received 2,051 usable responses. No attempt was made to examine the characteristics of graduates from departments that did not participate in the survey or of those graduates who did not mail back completed questionnaires.

DEFINITIONS

The questionnaire appears at the end of this report. Responses to questions on post-graduation status were edited to eliminate multiple responses and to reflect as accurately as possible the employment status of the respondent.

The term "inexperienced" as used in the tables refers to those who have 12 months or less of prior professional work experience. The term "chemist" refers to one who received a degree in chemistry. The term "chemical engineer" refers to one who received a degree in chemical engineering. Salary tables are based only on salaries of those who found full-time employment in chemistry or chemical engineering. Postdoctoral salaries are analyzed separately. Salaries are reported in U.S. dollars.

The Technical Notes present methods for estimating sampling error and also explain certain discrepancies among some of the tables.

TECHNICAL NOTES

DISCREPANCIES AMONG TABLES

Because not all individuals responded to all of the questionnaire items, some pairs of tables contain totals that should be identical but are not. For example, one table may group PhDs according to sex and another according to employer. The totals will differ unless the number who did not indicate their sex is the same as the number who did not indicate their employer.

ESTIMATES OF MEDIAN SALARIES

Median salaries displayed within the cells of the salary tables are sample medians and are therefore subject to sampling error. This error may be quite large, especially when the number of respondents in the corresponding cell is small. Therefore, median salaries in cells with fewer than 15 respondents should not be used to estimate their corresponding population medians. Similarly, tables showing the 25th and 75th salary percentiles, and those showing the 10th and 90th salary percentiles, should have at least 25 respondents and 40 respondents respectively.

COMPARING SALARIES

Often questions arise concerning women's salaries as compared with men's, or chemists' salaries as compared with chemical engineers'. These and similar comparisons require caution.

Statistical tests should be performed to determine whether observed differences in salaries of various sample groups could be mere chance occurrences resulting from peculiarities of the samples. Whether a difference in salaries is "statistically significant" depends not only on the magnitude of the difference but also on the sample sizes and the magnitudes of the sample standard deviations.

Statistical tests of significance may be found in Numerical and Statistical Techniques, by J. H. Pollard, Handbook of Tables for Probability and Statistics, published by the Chemical Rubber Company, and in other similar texts.

ESTIMATING SAMPLING ERROR FOR PERCENTS

Percents in this report are derived from the sample. If the entire population had received and returned questionnaires, most estimates would be somewhat different. How much different? Although this question does not have an exact answer, the table below does provide some guidance. To use the table, find the column headed by the percent (p) derived from the sample, and find the row appropriate for the sample size (n). (Approximations for p and n may be used.) Note the number in that column and that row of the table.

This number from the body of the table measures the precision with which the sample percent estimates the percent of the entire population. Specifically, if this procedure is applied repeatedly, about 95 times out of 100, the population percent will differ from the sample percent by no more than the amount shown in the table.

Approximate Sampling Errors for Percents

n	p= 10% or 90%	p= 20% or 80%	p= 30% or 70%	p= 40% or 60%	p= 50%
50	8.3%	11.1%	12.7%	13.6%	13.9%
100	5.9	7.8	9.0	9.6	9.8
200	4.2	5.5	6.4	6.8	6.9
500	2.6	3.5	4.0	4.3	4.4
1000	1.9	2.5	2.8	3.0	3.1
2000	1.3	1.8	2.0	2.1	2.2
5000	0.8	1.1	1.3	1.4	1.4
10000	0.6	0.8	0.9	1.0	1.0

In Table B-1a for example, 179 respondents classified as chemists indicated their highest degree as the bachelor's degree, and their employment status as employed full-time in chemistry or chemical engineering. The percent of this group who are women is listed as 44.1 percent (p=44.1). A "95% confidence interval" for this percent may be approximated by taking n and p to be about 200 and 40%. The table shows an approximate sampling error of 6.8%. Hence, the 95% confidence interval is 37.3% to 50.9%. If estimates were made at this "level of confidence" from 100 similar samples, about 95 of the confidence intervals calculated from these samples would contain the true population percent.

OFFICE OF THE
EXECUTIVE DIRECTOR

1155 SIXTEENTH STREET, N.W.
WASHINGTON, D.C. 20036
Phone (202) 872-4600

Summer 1986

Dear Colleague:

For many years, the American Chemical Society has gathered information about the starting salaries and employment status of chemistry and chemical engineering graduates through annual mail surveys of both ACS member and nonmember graduates. The data collected from these surveys have been very useful to chemists and chemical engineers, particularly as they start their careers, and the publication of such data has had a beneficial effect on salary levels. The data from these surveys have gained a reputation for reliability and usefulness.

I urge you, as a service to your colleagues and profession, to respond to this year's questionnaire. As a special incentive, the ACS is offering free airfare to, and meeting registration for, one of the 1987 ACS national meetings. This will be awarded to one randomly-selected respondent. (Hotel accommodations and all other expenses will be borne by the winner.) The winner will have the choice of attending the Denver national meeting in April 1987 or the New Orleans national meeting in August 1987. Please take a few minutes now to fill out the enclosed questionnaire, whether or not you have already accepted employment.

No personal identification is required or requested; the returns will be anonymous. To assure anonymity, while at the same time allowing us to determine a winner, a unique five-digit ID number has been written on each questionnaire. A computer program will generate a randomly-selected number corresponding to one of these approximately 12,000 ID numbers. A list correlating the ID numbers with the names and addresses of the respondents is kept separately, and will be available only for identifying the winner.

Please complete as many items on the questionnaire as possible and return it promptly. For your convenience, I have enclosed a self-addressed, postage-paid envelope. Results of the survey will be published in the CHEMICAL AND ENGINEERING NEWS' Career Issue this October and in a more extensive report later in the year.

Thank you for your assistance with this survey. I extend my best wishes for every success in your professional pursuits.

Sincerely,

John K Crum

John K Crum

AMERICAN CHEMICAL SOCIETY

Survey of Starting Salaries and Employment Status of 1986 Chemistry and Chemical Engineering Graduates

1. Highest degree earned:
- Bachelor's ☐ 1
- Master's ☐ 2
- Doctorate ☐ 3

2. Field of highest degree:
- Chemical engineering ☐ 1
- Biochemistry ☐ 2
- Analytical chemistry ☐ 3
- Inorganic chemistry ☐ 4
- Organic chemistry ☐ 5
- Physical chemistry ☐ 6
- Polymer chemistry ☐ 7
- Other chemistry ☐ 8
- Other ☐ 9

3. Professional or technical work experience prior to graduation
- Less than 12 months (or none) ☐ 1
- 12 to 36 months ☐ 2
- More than 36 months ☐ 3

4. Did you participate in a chemistry or chemical engineering cooperative education program while in college or graduate school?
- Yes ☐ 1
- No ☐ 2

5. Age at last birthday: ☐☐ years old

6. Sex:
- Male ☐ 1
- Female ☐ 2

7. Citizenship or visa status:
- U.S. native ☐ 1
- U.S. naturalized ☐ 2
- U.S. permanent resident visa ☐ 3
- Other visa ☐ 4

8. Racial or ethnic group:
- White (not of Hispanic origin) ☐ 1
- Black (not of Hispanic origin) ☐ 2
- Hispanic ☐ 3
- American Indian or Alaskan Native ☐ 4
- Asian or Pacific Islander ☐ 5
- Other race or ethnic group ☐ 6

9. Will you pursue advanced studies in the fall of 1986?
- No ☐ 1
- Yes, full-time ☐ 2
- Yes, part-time ☐ 3

a. If yes, field of further studies:
- Chemistry ☐ 01
- Other physical science or math ☐ 02
- Chemical engineering ☐ 03
- Other engineering ☐ 04
- Biochemistry ☐ 05
- Life science ☐ 06
- Medicine ☐ 07
- Dentistry ☐ 08
- Pharmacy, pharmacology ☐ 09
- Business management ☐ 10
- Education ☐ 11
- Law ☐ 12
- Other ☐ 13

10. Current employment status:
- Accepted or continuing full-time employment (excluding summer employment) ☐ 1
- Accepted a graduate assistantship, fellowship or postdoctoral fellowship ☐ 2
- Not employed, employed part-time or for summer only: and seeking full-time, year-round employment ☐ 3
- and not seeking full-time, year-round employment ☐ 4

IF YOU CHECKED NUMBER 3 or 4, PLEASE STOP HERE AND RETURN THE QUESTIONNAIRE IN THE ENVELOPE PROVIDED

11. Your annual salary: $_____ per year

IF YOU HOLD AN ASSISTANTSHIP OR FELLOWSHIP, PLEASE STOP HERE AND RETURN THE QUESTIONNAIRE IN THE ENVELOPE PROVIDED.

12. How many firm offers of employment did you receive in a field of chemistry or chemical engineering?

Specify number _____

13. How did you find out about your current job?
(Check the one that BEST applies)
- ACS Services
  - C&EN classifieds ☐ 01
  - National/regional meeting employment services ☐ 02
  - Local section contacts ☐ 03
- Services of other professional organizations ☐ 04
- Personal initiative ☐ 05
- Campus recruiting/placement office ☐ 06
- Newspaper ad ☐ 07
- Personal contact/employee referral ☐ 08
- State or federal employment service ☐ 09
- Employment agency ☐ 10
- Other ☐ 11

14. Check the one specialty most related to your job:
- Chemical engineering ☐ 1
- Chemistry (including biochemistry) ☐ 2
- Other ☐ 3

15. How long have you been working for your current employer?
- 12 months or less ☐ 1
- More than 12 months ☐ 2

16. Check the one category that best describes your employer:
- Private industry ☐ 1
- College or university ☐ 2
- High school or other school ☐ 3
- Federal government (civilians only) ☐ 4
- Military ☐ 5
- State or local government ☐ 6
- Hospital or independent laboratory ☐ 7
- Other ☐ 8

THANK YOU FOR YOUR PARTICIPATION.
