

BRIEF CONTENTS

UNIT 0 *Getting to Know Chemistry in the Community*

- Section A** The Central Science
- Section B** Living Within Communities
- Section C** Inquiry and Investigation
- Section D** Learning and Applying Chemistry

UNIT 1 *Materials: Formulating Matter*

- Section A** Building Blocks of Chemistry
- Section B** Periodic Trends
- Section C** Minerals and Moles
- Section D** Conservation and Chemical Equations

UNIT 2 *Air: Designing Scientific Investigations*

- Section A** Properties of Gases
- Section B** Physical Behavior of Gases
- Section C** Interactions of Matter and Energy in Atmospheres
- Section D** Human Impact on Air Quality

UNIT 3 *Petroleum: Breaking and Making Bonds*

- Section A** Petroleum—What Is It?
- Section B** Petroleum: A Building-Material Source
- Section C** Petroleum: An Energy Source
- Section D** Alternatives to Petroleum

UNIT 4 *Water: Exploring Solutions*

- Section A** Sources, Uses, and Properties of Water
- Section B** Looking at Water and Its Contaminants
- Section C** Reactions in Solution
- Section D** Water Purification and Treatment

UNIT 5 *Industry: Applying Chemical Reactions*

- Section A** Providing Nutrients for Agriculture
- Section B** Industrial Production of Ammonia
- Section C** Generating Electrical Energy from Chemical Reactions
- Section D** Industrial Production of Batteries

UNIT 6 *Atoms: Nuclear Interactions*

- Section A** The Nature of Atoms
- Section B** Nuclear Radiation
- Section C** Using Radioactivity
- Section D** Nuclear Energy: Benefits and Burdens

UNIT 7 *Food: Matter and Energy for Life*

- Section A** Food as Energy
- Section B** Carbohydrates and Fats
- Section C** Proteins
- Section D** Vitamins, Minerals, and Additives

CONTENTS

PREFACE	xi	A.8 ■ Modeling Matter Pictures in the Mind	38
UNIT		A.9 The Elements	41
GETTING TO KNOW CHEMISTRY IN THE COMMUNITY	2	A.10 ■ Investigating Matter Metal or Nonmetal	42
Section A The Central Science	4	A.11 ■ Making Decisions It's Only Money	45
Concept Check 1	4	Section A Summary	47
A.1 What in the World Is Chemistry?	5	Section B Periodic Trends	50
A.2 ■ Making Decisions Why Study Chemistry?	6	Concept Check 3	50
Section B Living Within Communities	7	B.1 ■ Making Decisions Grouping the Elements	51
CHEMQUANDARY: Visions of Community	7	B.2 Early Periodic Tables	52
Section C Inquiry and Investigation	8	B.3 The Electrical Nature of Matter	53
C.1 Investigating Safely	8	B.4 The Modern Periodic Table	54
C.2 ■ Developing Skills Safety in the Laboratory and Everyday Life	10	B.5 ■ Developing Skills Counting Subatomic Particles	56
C.3 ■ Investigating Matter Density of Solids and Liquids	11	B.6 ■ Developing Skills Periodic Variation in Properties	57
Section D Learning and Applying Chemistry	15	B.7 Organization of the Periodic Table	61
Concept Check 2	15	B.8 ■ Developing Skills Predicting Properties	62
D.1 Learning Activities in a ChemCom Unit	16	B.9 ■ Investigating Matter Periodic Trends	63
D.2 ■ Developing Skills Exploring the Structure of a ChemCom Unit	17	Concept Check 4	65
Putting It All Together	19	B.10 Ions and Ionic Compounds	65
Welcome to Chemistry	19	B.11 ■ Modeling Matter Ionic Compounds	67
UNIT 1		B.12 ■ Investigating Matter Relative Reactivities of Metals	71
MATERIALS: FORMULATING MATTER	20	B.13 Metal Reactivity	73
Section A Building Blocks of Chemistry	24	CHEMQUANDARY: Discovery of Metals	74
Concept Check 1	25	B.14 ■ Developing Skills Trends in Metal Reactivity	75
A.1 ■ Investigating Matter Exploring Properties of Matter	25	B.15 ■ Making Decisions Characteristics of Currency	76
A.2 Properties Make the Difference	31	Section B Summary	77
A.3 ■ Developing Skills Physical and Chemical Properties	32	CHEMISTRY AT WORK: Pyrotechnic Chemistry	80
A.4 Properties Matter: Designing the Penny	34	Section C Minerals and Moles	82
Concept Check 2	35	Concept Check 5	83
A.5 The Particulate View of Matter	35	C.1 ■ Making Decisions Metal Resources, Production, and Use	83
A.6 Symbols, Formulas, and Equations	36	C.2 Sources and Uses of Metals	86
A.7 ■ Developing Skills Chemical Symbols and Formulas	38	C.3 ■ Investigating Matter Extracting Zinc	89
		C.4 Composition of Materials	91
		C.5 ■ Developing Skills Applications of Percent Composition	92
		C.6 Introduction to the Mole Concept	93
		C.7 ■ Developing Skills Molar Masses	98
		Concept Check 6	98
		C.8 Moles and Percent Composition	99
		C.9 ■ Developing Skills Percent Composition	100

C.10 Mining and Refining	101	A.7 Designing Scientific Investigations: Getting Started	165
C.11 Modeling Matter Electrons and Redox Processes	105	A.8 Developing Skills Designing an Experiment to Investigate Temperature– Volume Relationships	167
C.12 Investigating Matter Copper Plating	107	A.9 Investigating Matter Exploring Temperature–Volume Relationships	168
C.13 Electroplating	108	A.10 Temperature–Volume Behavior of Gases	170
C.14 The Life Cycle of a Material	110	A.11 Developing Skills Predicting Gas Behavior: Temperature–Volume	172
C.15 Making Decisions Life Cycle of a Coin	111	Concept Check 3	173
Section C Summary	112	A.12 Temperature–Pressure Behavior of Gases	174
Section D Conservation and Chemical Equations	116	A.13 Developing Skills Using Gas Relationships	174
Concept Check 7	116	A.14 Making Decisions Asking Questions and Gathering Evidence	175
D.1 Examining Chemical Equations	117	Section A Summary	177
D.2 Modeling Matter Representing Reactions	118	Section B Physical Behavior of Gases	180
D.3 Keeping Track of Atoms	121	Concept Check 4	180
D.4 Developing Skills Accounting for Atoms	124	B.1 Atoms and Molecules in Motion	181
D.5 Nature’s Conservation: Balanced Chemical Equations	126	B.2 Modeling Matter Understanding Kinetic Molecular Theory	184
D.6 Developing Skills Writing Chemical Equations	129	B.3 Scientific Theories, Models, and Laws	185
Concept Check 8	131	B.4 The Ideal Gas Law	186
D.7 Investigating Matter Striking It Rich	132	B.5 Developing Skills Using the Ideal Gas Law	189
D.8 Combining Atoms: Alloys	134	Concept Check 5	190
CHEMQUANDARY: Five Cents’ Worth	134	B.6 Non-Ideal Gas Behavior	190
D.9 Conservation in the Community	136	B.7 Temperature, Heat, and Phase Changes	191
D.10 Making Decisions Rethinking, Reusing, Reducing, and Recycling	139	B.8 Investigating Matter Phase Changes	193
Section D Summary	140	B.9 Making Decisions Using KMT to Refine Your Air-Quality Investigation	195
Putting It All Together		Section B Summary	196
Making the Case for Currency	143	CHEMISTRY AT WORK: Historic Preservation	200
UNIT 2		Section C Interactions of Matter and Energy in Atmospheres	202
AIR: DESIGNING SCIENTIFIC INVESTIGATIONS	146	Concept Check 6	203
Section A Properties of Gases	151	C.1 Gases in Our Atmosphere	203
Concept Check 1	152	CHEMQUANDARY: Traveling the Atmosphere	203
A.1 Investigating Matter Properties of Gases	152	C.2 Developing Skills Graphing Atmospheric Data	204
A.2 Pressure	156	C.3 Structure of Earth’s Atmosphere	206
Concept Check 2	158	C.4 Modeling Matter Mixtures of Gases	208
A.3 Developing Skills Applications of Pressure	159	Concept Check 7	210
A.4 Atmospheric Pressure	160	C.5 Collision Theory	211
A.5 Pressure–Volume Behavior of Gases	161	C.6 Reactions of Gases	213
A.6 Developing Skills Predicting Gas Behavior: Pressure–Volume	164	C.7 Developing Skills Stoichiometry in Reactions of Gases	214

C.8 ■ Investigating Matter Generating and Analyzing CO ₂	216	A.6 Petroleum Refining	280
Concept Check 8	220	Concept Check 2	281
C.9 The Electromagnetic Spectrum and Solar Radiation	220	A.7 Examining Petroleum's Molecules	282
CHEMQUANDARY: Always Harmful?	223	A.8 ■ Developing Skills Hydrocarbon Boiling Points	282
C.10 Earth's Energy Balance	225	A.9 ■ Modeling Matter Modeling Alkanes	283
C.11 ■ Developing Skills Solar Radiation	227	A.10 ■ Developing Skills Trends in Alkane Boiling Points	286
C.12 ■ Making Decisions Making Claims and Providing Evidence	228	Concept Check 3	288
Section C Summary	230	A.11 Intermolecular Forces	288
Section D Human Impact on Air Quality	234	A.12 ■ Modeling Matter Alkane Isomers	289
Concept Check 9	234	A.13 ■ Developing Skills Boiling Points of Alkane Isomers	291
D.1 Sources of Air Pollutants	235	CHEMQUANDARY: Fuels and Climate	292
D.2 ■ Investigating Matter Detecting Pollutants in Air	238	A.14 ■ Making Decisions Who Has the Oil?	292
D.3 Monitoring and Identifying Air Pollutants	241	Section A Summary	294
D.4 ■ Developing Skills Drawing Conclusions from Air Pollution Data	243	Section B Petroleum: A Building-Material Source	297
Concept Check 10	245	Concept Check 4	297
D.5 Smog: Hazardous to Your Health	245	B.1 ■ Making Decisions Life Cycle of a Polymer	298
D.6 ■ Developing Skills Vehicles and Smog	247	B.2 Chemical Bonding	299
CHEMQUANDARY: Controlling Air Pollution	248	B.3 ■ Developing Skills Predicting and Representing Chemical Bonds	303
D.7 Acids, Bases, and the pH Scale	248	Concept Check 5	305
D.8 Acid Rain	251	B.4 Creating New Options: Petrochemicals	305
D.9 ■ Investigating Matter Effects of Acid Rain	252	B.5 ■ Modeling Matter Polymer Structure and Properties	307
D.10 Consequences and Control of Acid Rain	254	B.6 Beyond Alkanes	310
CHEMQUANDARY: The Rain in Maine . . .	257	B.7 ■ Modeling Matter Builder Molecules	311
D.11 ■ Making Decisions Improving Earth's Air Quality	257	Concept Check 6	314
Section D Summary	258	B.8 Carbon Rings as Builder Molecules	314
Putting It All Together		B.9 Builder Molecules Containing Oxygen	316
Investigating Air-Quality Claims	261	B.10 ■ Investigating Matter Condensation	317
		B.11 Condensation Polymers	321
		B.12 ■ Making Decisions Builder Molecules in Transportation	322
		Section B Summary	324
		CHEMISTRY AT WORK: Environmental Chemistry	328
		Section C Petroleum: An Energy Source	330
		Concept Check 7	330
		C.1 ■ Investigating Matter Comparing Fuels	331
		C.2 Energy From Fossil Fuels	333
		C.3 ■ Developing Skills Energy in Chemical Reactions	336
		C.4 ■ Investigating Matter Combustion	337
		Concept Check 8	341
		C.5 Using Heats of Combustion	341
		C.6 ■ Developing Skills Heats of Combustion	342

UNIT

3

PETROLEUM: BREAKING AND MAKING BONDS 264**Section A Petroleum—What Is It?** 268

Concept Check 1 269

A.1 ■ **Investigating Matter** Properties of Petroleum 269

A.2 Petroleum: A Source of Energy and Hydrocarbons 271

A.3 Origin and Distribution of Petroleum 273

A.4 ■ **Developing Skills** Your Carbon Footprint 276A.5 ■ **Investigating Matter** Separation by Distillation 277**Section C Petroleum: An Energy Source** 330

Concept Check 7 330

C.1 ■ **Investigating Matter** Comparing Fuels 331

C.2 Energy From Fossil Fuels 333

C.3 ■ **Developing Skills** Energy in Chemical Reactions 336C.4 ■ **Investigating Matter** Combustion 337

Concept Check 8 341

C.5 Using Heats of Combustion 341

C.6 ■ **Developing Skills** Heats of Combustion 342

C.7	■ Modeling Matter Incomplete Combustion	343	A.5	Mixtures and Solutions	402	
C.8	The Carbon Cycle	345	A.6	■ Modeling Matter Representing Mixtures	403	
C.9	■ Developing Skills Trends in Atmospheric CO ₂ Levels	346		Concept Check 2	404	
C.10	Greenhouse Gases and Global Climate Change	348	A.7	Water Supply and Demand	404	
C.11	Response to Global Climate Change	351	A.8	■ Making Decisions Water-Use Analysis	406	
C.12	■ Making Decisions Fuel for Transportation	353	A.9	Where Is the World's Water?	409	
	Section C Summary	354	A.10	■ Making Decisions Riverwood Water Use	410	
				Section A Summary	412	
	Section D Alternatives to Petroleum	358		Section B Looking at Water and Its Contaminants	415	
	Concept Check 9	358		Concept Check 3	415	
D.1	Energy: Past and Present	359	B.1	■ Investigating Matter What Substances Dissolve in Water?	416	
D.2	■ Developing Skills Fuel Sources Over the Years	360	B.2	Dissolving Ionic Compounds in Water	419	
D.3	Energy Efficiency	361	B.3	Dissolving Molecular Compounds in Water	422	
D.4	■ Developing Skills Energy Conversion Efficiency	362		Concept Check 4	424	
	Concept Check 10	364	B.4	■ Modeling Matter The Dissolving Process	424	
D.5	Altering Fuels	364	B.5	Solution Concentration	427	
D.6	■ Making Decisions Oxygenated Fuels	368	B.6	■ Developing Skills Describing Solution Concentration	428	
D.7	Alternative Fuels and Energy Sources	369		Concept Check 5	430	
D.8	■ Investigating Matter Synthesizing and Evaluating Biodiesel Fuel	371	B.7	■ Investigating Matter Measuring Solution Concentration	430	
D.9	■ Making Decisions Biodiesel as a Petroleum Substitute	374	B.8	Factors That Affect Solubility of Solids in Water	435	
	Concept Check 11	375	B.9	■ Developing Skills Solubility and Solubility Curves	436	
D.10	Alternative-Fuel Vehicles	375	B.10	Factors That Affect Solubility of Gases in Water	438	
D.11	Alternative Sources for Builder Molecules	381	B.11	■ Modeling Matter Solubility and Concentration	439	
D.12	■ Making Decisions Evaluating Alternative-Fuel Options	382	B.12	Temperature, Dissolved Oxygen, and Life	441	
	Section D Summary	383	B.13	■ Making Decisions The Riverwood Water Mystery: Considering Dissolved Oxygen	443	
				Section B Summary	444	
	Putting It All Together			Section C Reactions in Solution	447	
	Getting Mobile	386		Concept Check 6	447	
				C.1	■ Investigating Matter Combining Solutions	448
				C.2	Precipitation Reactions	449
				C.3	■ Developing Skills Writing Net Ionic Equations	451
				C.4	■ Investigating Matter Water Testing	452
				C.5	Acids and Bases in Solution	454
				C.6	■ Developing Skills Acids and Bases	456
					Concept Check 7	457
				C.7	Solution Concentration and pH	457

UNIT

4

WATER: EXPLORING SOLUTIONS 388**Section A Sources, Uses, and Properties
of Water** 393

	Concept Check 1	393
A.1	Town in Crisis	394
	CHEMQUANDARY: Water, Water Everywhere	394
A.2	■ Making Decisions Uses of Water	395
A.3	■ Investigating Matter Properties of Water	396
A.4	Physical Properties of Water	399

C.8	Developing Skills Interpreting the pH Scale	459	A.5	Fixing Nitrogen by Oxidation–Reduction	517
C.9	Making Decisions Sources of Acidic and Basic Contamination	460	A.6	Developing Skills Determining Oxidation States	520
C.10	Strengths of Acids and Bases	460	A.7	Products of the Chemical Industry	522
C.11	Modeling Matter Strong Versus Concentrated	462	A.8	Making Decisions Chemical Processing in Your Life	523
	Concept Check 8	462		Section A Summary	524
C.12	Buffers	463		Section B Industrial Production of Ammonia	527
C.13	Investigating Matter Acids, Bases, and Buffers	464		Concept Check 3	527
C.14	Making Decisions Analyzing Water-Quality Data	468	B.1	Kinetics and Equilibrium	528
	Section C Summary	471	B.2	Investigating Matter Le Châtelier's Principle	532
	CHEMISTRY AT WORK: Water-Quality Chemistry	474	B.3	Developing Skills Chemical Systems at Equilibrium	535
	Section D Water Purification and Treatment	477	B.4	Industrial Synthesis of Ammonia	536
	Concept Check 9	477	B.5	Nitrogen's Other Face	536
D.1	Making Decisions Considering Contaminants in Water Supplies	478	B.6	Developing Skills Explosive Nitrogen Chemistry	540
D.2	Investigating Matter Foul Water	479		Concept Check 4	540
D.3	Natural Water Purification	482	B.7	From Raw Materials to Products	541
D.4	Drinking-Water Treatment	484	B.8	Ammonia and Energy Use	542
D.5	Developing Skills Water Purification	486	B.9	Green Chemistry	543
	Concept Check 10	486	B.10	Making Decisions What Does Riverwood Want?	544
D.6	Disinfection of Drinking Water	487		Section B Summary	545
D.7	Developing Skills Benefits and Risks of Disinfection	488		Section C Generating Electrical Energy from Chemical Reactions	548
	CHEMQUANDARY: Bottled Water Versus Tap Water	489		Concept Check 5	548
D.8	Home Water Treatment	490	C.1	Converting Chemical Energy into Electricity	549
D.9	Making Decisions Searching for Solutions	493	C.2	Investigating Matter Voltaic Cells	551
	Section D Summary	495	C.3	Voltaic Cells and Half-Reactions	553
	Putting It All Together			CHEMQUANDARY: Energy Cells: Are They All Created Equal?	553
	Fish-Kill—Finding the Solution	498	C.4	Developing Skills Getting Charged by Electrochemistry	554
				Concept Check 6	555
			C.5	Equilibrium in Electrochemical Systems	555
			C.6	Modeling Matter Visualizing Changes Within Voltaic Cells	556
			C.7	Making Decisions What Do We Need to Know about WYE?	557
				Section C Summary	558
				CHEMISTRY AT WORK: Materials Science	560
				Section D Industrial Production of Batteries	562
				Concept Check 7	562
			D.1	Investigating Matter Building a Voltaic Pile	563
			D.2	Cell Potential	564

UNIT

5

INDUSTRY: APPLYING CHEMICAL REACTIONS 502

Section A Providing Nutrients for Agriculture 506

Concept Check 1 506

A.1 **Investigating Matter** Fertilizer Components 507

A.2 Fertilizer and the Nitrogen Cycle 512

A.3 **Making Decisions** Plant Nutrients 515

A.4 **Modeling Matter** The Nitrogen Cycle 515

Concept Check 2 517

D.3 ■ Developing Skills Determining Potential in Electrochemical Cells	566	B.6 ■ Developing Skills Nuclear Balancing Act	624
D.4 Primary Batteries	567	Concept Check 4	625
CHEMQUANDARY: Battery Sizes	568	B.7 Radon	626
D.5 Secondary Batteries	569	B.8 Nuclear Radiation Detectors	628
Concept Check 8	572	B.9 ■ Investigating Matter Cloud Chambers	630
D.6 Manufacturing and Recycling Batteries	572	B.10 ■ Making Decisions Ensuring Public Safety	632
D.7 ■ Modeling Matter Life Cycle of a Battery	574	Section B Summary	633
CHEMQUANDARY: Commodity or Specialty	575	CHEMISTRY AT WORK: Nuclear Chemistry	636
D.8 Moving Toward Greener Methods and Products	576	Section C Using Radioactivity	638
D.9 ■ Making Decisions Asset or Liability?	577	Concept Check 5	638
Section D Summary	580	C.1 Half-Life: A Radioactive Clock	638
Putting It All Together		C.2 ■ Modeling Matter Understanding Half-Life	640
A Chemical Plant for Riverwood?	582	C.3 ■ Developing Skills Applications of Half-Lives	642
		CHEMQUANDARY: Carbon-14 Dating	644
		C.4 Radioisotopes in Medicine	644
		CHEMQUANDARY: Using Radioisotopes in Medicine	646
		C.5 Nuclear Medicine Technologies	647
		Concept Check 6	649
		C.6 Artificial Radioactivity	649
		CHEMQUANDARY: Transmutation of Elements	650
		C.7 ■ Developing Skills Nuclear-Bombardment Reactions	651
		C.8 Extending the Periodic Table	652
		C.9 ■ Making Decisions Opinions About Radioactivity	654
		Section C Summary	655
		Section D Nuclear Energy: Benefits and Burdens	658
		Concept Check 7	658
		D.1 Unleashing Nuclear Forces	659
		D.2 ■ Modeling Matter Chain Reactions	662
		D.3 Nuclear Power Plants	663
		D.4 Nuclear Fusion	667
		Concept Check 8	669
		D.5 ■ Making Decisions The Safest Journey	670
		CHEMQUANDARY: Risk-Free Travel?	671
		D.6 Radioactive Waste	671
		D.7 ■ Developing Skills Disposing of High- and Low-Level Wastes	675
		D.8 ■ Making Decisions Discussing Nuclear Energy	676
		Section D Summary	677
		Putting It All Together	
		Communicating Scientific and Technological Information	680

UNIT

6

ATOMS: NUCLEAR INTERACTIONS 584**Section A The Nature of Atoms** 588

Concept Check 1 588

A.1 ■ **Investigating Matter** Exploring Ionizing Radiation 589

A.2 The Great Discovery 590

CHEMQUANDARY: Scientific Discoveries 594

A.3 Nuclear Radiation 594

A.4 The Gold-Foil Experiment 597

A.5 Architecture of Atoms 599

A.6 ■ **Developing Skills** Interpreting Isotopic Notation 601A.7 ■ **Modeling Matter** Isotopic Pennies 601

Concept Check 2 602

A.8 Isotopes in Nature 602

A.9 ■ **Developing Skills** Molar Mass and Isotopic Abundance 603A.10 ■ **Making Decisions** Fact or Fiction? 605

Section A Summary 606

Section B Nuclear Radiation 609

Concept Check 3 609

B.1 Exposure to Ionizing Radiation 610

CHEMQUANDARY: Radiation Exposure Standards 612

B.2 ■ **Making Decisions** Your Yearly Ionizing Radiation Dose 613

B.3 Ionizing Radiation—How Much Is Safe? 615

B.4 ■ **Investigating Matter** Alpha, Beta, and Gamma Radiation 617

B.5 Natural Radioactive Decay 621

UNIT

FOOD: MATTER AND ENERGY FOR LIFE 682

Section A Food as Energy 686

Concept Check 1 686

A.1 Food Groups 687

A.2 **■ Making Decisions** Diet and Food Groups 688

A.3 **■ Investigating Matter** Energy Contained in a Snack 689

Concept Check 2 691

A.4 Energy Flow—From the Sun to You 691

CHEMQUANDARY: How Does Your Garden Grow? 693

A.5 Energy Release and Storage 694

A.6 **■ Developing Skills** Energy in Action 696

A.7 Energy In—Energy Out 698

A.8 **■ Developing Skills** Gain Some, Lose Some 698

A.9 **■ Making Decisions** Energy Intake and Expenditure 700

Section A Summary 701

Section B Carbohydrates and Fats 704

Concept Check 3 704

B.1 Carbohydrates: One Way to Combine C, H, and O Atoms 705

B.2 Fats: Another Way to Combine C, H, and O Atoms 708

B.3 Saturated and Unsaturated Fats 710

B.4 **■ Developing Skills** Calories from Fat 711

B.5 Hydrogenation 712

B.6 **■ Developing Skills** Fats in the Diet 714

CHEMQUANDARY: Fat-Free Food? 714

Concept Check 4 715

B.7 Limiting Reactants 715

B.8 **■ Modeling Matter** Limiting-Reactant Analogies 716

B.9 Limiting Reactants in Chemical Reactions 718

B.10 **■ Developing Skills** Using Chemical Equations to Find Limiting Reactants 719

B.11 **■ Making Decisions** Analyzing Fats and Carbohydrates 721

Section B Summary 722

CHEMISTRY AT WORK: Flavor Chemistry 726

Section C Proteins 728

Concept Check 5 728

C.1 Proteins—Function and Structure 729

C.2 **■ Modeling Matter** Molecular Structure of Proteins 731

C.3 Protein in Your Diet 733

C.4 **■ Developing Skills** Daily Protein Requirements 737

Concept Check 6 738

C.5 **■ Investigating Matter** Enzymes 738

C.6 How Enzymes Work 740

CHEMQUANDARY: A Problem to Chew On 742

C.7 **■ Investigating Matter** Amylase Tests 742

C.8 **■ Making Decisions** Protein Content 745

Section C Summary 746

Section D Vitamins, Minerals, and Additives 748

Concept Check 7 748

D.1 Vitamins 749

D.2 **■ Developing Skills** Vitamins in the Diet 752

D.3 **■ Investigating Matter** Vitamin C 754

D.4 Minerals: Essential Within All Diets 757

D.5 **■ Developing Skills** Minerals in the Diet 760

Concept Check 8 761

D.6 Food Additives 761

D.7 **■ Investigating Matter** Analyzing Food-Coloring Additives 764

D.8 Regulating Additives 766

CHEMQUANDARY: Nitrite Additives 768

D.9 Artificial Sweeteners 768

D.10 **■ Developing Skills** Food Additive Survey 770

D.11 **■ Making Decisions** Analyzing Vitamins and Minerals 770

Section D Summary 772

Putting It All Together 776

Guiding the PTSA's Decisions

APPENDICES A-1

GLOSSARY G-1

INDEX I-1
