

Table of Contents

		To the Instructor	v
		To the Student	v
		Key Ideas of Green Chemistry	vi
		Science Writing Heuristic	vi
		Safety in the Laboratory	1
Investigation 1	Ch. 1	Chemical and Physical Changes	2
Investigation 2	Ch. 1/2	Accuracy and Precision of Measurements	5
Investigation 3	Ch. 2	Air Pollution and Properties of Gases	9
Investigation 4	Ch. 3	Color and Light	15
Investigation 5	Ch. 3	Sunscreen and UV Protection	19
Investigation 6	Ch. 4	Molar Mass and Molar Ratios	24
Investigation 7	Ch. 4	Greenhouse Gas Effect	28
Investigation 8	Ch. 5	Acid Rain	30
Investigation 9	Ch. 5	Investigation Solubility	33
Investigation 10	Ch. 5	Extracting Limonene with Liquid CO ₂	35
Investigation 11	Ch. 5	Water Analysis	40
Investigation 12	Ch. 6	Energy Content in Biodiesel	46
Investigation 13	Ch. 7	Radioactivity	51
Investigation 14	Ch. 8	Exploring Electrochemistry	54
Investigation 15	Ch. 8	Fruit Battery	60
Investigation 16	Ch. 9	Polymers: Properties and Synthesis	62
Investigation 17	Ch. 9	Polymer Identification and Degradation	66
Investigation 18	Ch. 10/11	Fermentation and Distillation of Ethanol	71
Investigation 19	Ch. 11	Measuring Fat in Potato Chips and Hot Dogs	76
Investigation 20	Ch. 11	Measuring Salt in Food	80
Investigation 21	Ch. 12	Equilibrium and LeChâtelier's Principle	83
Investigation 22	Ch. 12	Aspirin Synthesis and Analgesics Identification	87
Investigation 23	Ch. 13	Isolating DNA from Plant and Animal Cells	92
Investigation 24	Ch. 14	Paint and Arson: A Forensic Analysis	96
		Lab Methods Appendix	A-1
