The American Chemical Society (ACS) is pleased to announce the ACS Bridge Travel Award program. This initiative is designed to defray costs associated with attending the National ACS Spring meeting or the annual Fall meeting of the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers (NOBCChE) for students from underrepresented minority groups. The goal of the ACS Bridge Travel Award program is to increase the number of students from underrepresented groups that gain access to doctoral programs in the chemical sciences.

The ACS Bridge Program and the ACS Bridge Travel Awards of the ACS Bridge Project are parts of The NSF INCLUDES Alliance: Inclusive Graduate Education Network (IGEN). The goal of this alliance is to increase the participation of underrepresented minority (URM) students who enter graduate or doctorate level programs in the physical sciences. For more information about IGEN visit: www.IGENetwork.org.

The ACS Bridge Project has support from the National Science Foundation through grant NSF-1834545 and through the American Chemical Society.
Travel Support for Students who:

- Are undergraduates
- Have not been accepted into a graduate program
- Identify as an underrepresented minority

“Professional meetings are fun! You can learn about valuable resources relevant to your own professional development and you can network with students and researchers from universities, national labs, and industry.” – Joerg Schlatterer
