

Name: _____

Harper College
Field Trip 1st visit summary

Overall rate your experience in the following categories:

1. Tour of the campus

1	2	3	4	5
Not Great				Wonderful

Overall comments (would you have wanted to see more/less?):

2. College group:

1	2	3	4	5
Didn't know what to do				Extremely knowledgeable

1	2	3	4	5
Didn't include everyone				Involved the whole group

1	2	3	4	5
Didn't learn anything				Learned a lot about lab techniques

Overall comments (how well did the college group help you learn more about water and lab techniques):

3. Water Chemistry knowledge:

1	2	3	4	5
Didn't learn much				Learned a lot of new things

Overall experience (was this worth your time and/or increased your knowledge about water quality):

Answer the following questions based on information you learned from your experience at Harper College.

1. Describe how to filter a "dirty" sample of water.
2. Name some ions that were tested in the water samples.
3. Describe the flame test lab and what it was testing.
4. Please describe your overall experience from the Harper College visits.
5. Did the fieldtrip experience change the way you "perceive" the college life? How?
6. What field of study are you thinking about majoring in in college?
7. Overall, was the fieldtrip worth the experience?
