Molecular Jump Rope: Synthesis and Study of Axial Chirality in Cyclophanes Lacking Stereocenters
Kenneth Miller, Fort Lewis College

Narrative Report

I was on sabbatical during the 2018-2019 academic year, and my research program at FLC was temporarily placed on hold while I traveled to Valencia, Spain to participate in unrelated research projects at the Polytechnic University of Valencia. Given that no FLC students traveled with me, I did not utilize funds to pay students or myself last year. I only used a small amount of money to replace some supplies in the laboratory. I was granted a one-year extension, and I plan to work with three students this summer as well as several more during this academic year. We are planning on completing the project and submitting a publication by the end of the fiscal year of the grant.
