Do you have a passion for applying chemistry to the grand challenges of sustainability?

If so and you are a graduate student or postdoctoral scholar studying in the U.S., Canada, or Latin America, we invite you to apply to the 2019 American Chemical Society (ACS) Summer School on Green Chemistry & Sustainable Energy!

The Summer School is a weeklong residential program on the campus of the Colorado School of Mines in Golden, Colorado. Participants explore scientific solutions to global sustainability challenges through presentations by green chemistry and sustainable energy experts, collaborative projects and discussions, poster sessions, and more.

Transportation, shared on-campus housing, meals, and program costs are provided free of charge thanks to a generous grant from the ACS Petroleum Research Fund.
