We’re launching a new feature this week—the One-Minute Mentor. It is a brief comment—225 words or fewer—with the best advice from industry veterans and senior leaders. Bill Carroll kicks things off this week with advice on the power of imagining yourself in different roles. As Bill puts it, you need to “see it to be it.”

While laboratory audits tend to focus on objects in the lab (e.g., labels, hazardous materials, safety equipment, working spaces, storage), some consultants approach things differently—they want to talk with people working in the lab. Our safety expert, Ken Fivizzani, explains how these “listening audits” work.

In the 5th Quarter, David Eaton, who spent much of his career with DuPont Central R&D, has retired twice. He tells his story and shares some pointed advice for those in their 20s and 30s about managing today’s workplace.

ON THE SAFE SIDE

Ken Fivizzani
Safety Expert
ACS

Traditional laboratory audits tend to focus on objects in the lab, though some consultants would rather converse with the people working in the lab. Our safety expert, Ken Fivizzani, explains how these “listening audits” work. Go to Article

MORE FROM ACS

ACS Virtual Office Hours
Explore Non-Traditional Chemistry Careers at ACS’ Dec. 2 Virtual Office Hour!

Curious about a non-traditional chemistry career? Learn the typical tasks, education requirements, and personal characteristics that will help you succeed during ACS Virtual Office Hours on December 2nd. You will also get personalized career advice and network in small groups lead by ACS Career Consultants. Register for free today!

2022 Heroes of Chemistry Nominations are Open Through Feb. 1, 2022!

Nominations for the ACS Heroes of Chemistry Awards are open now through February 1! The Heroes of Chemistry Award is one of the highest honors ACS gives to industrial chemists, recognizing teams whose work and research led to the development of successfully commercialized products benefiting humankind.

Any private or publicly owned for-profit company may nominate a team of chemists or allied scientists who played a vital role in the research and development of a commercial product that has had an impact on the welfare and progress of humanity. Nominating companies may choose to include individuals from other companies, government or academic labs, incubators, or other organizations as members of the teams they nominate. Former and deceased employees are eligible to be included in the nomination. The company nominating the technology must be the current owner of the technology. Celebrate your company’s hard work and success in innovation – nominate today!

Upcoming from ACS Webinars
Wednesday, 11/17: New Polymers in Space: Long-term Exploration Beyond Our Planet

The return to deep space flight and planetary exploration opens up new and exciting areas for materials research, as well as new challenges requiring pioneering new technologies. Join two NASA scientists as they discuss the cutting-edge research and development of advanced polymer material capabilities, such as those demonstrated by polymer aerogels and copoly (carbonate urethane) materials. Register for free!

Thursday, 11/18: How Wildfire Smoke Impacts the Quality of Wine

Wildfires in the American West have devastated this part of the country, but there is also growing concern over how smoke will impact the quality of wine from this region. Discover how certain chemical and biological processes help winemakers produce high quality wine even if wildfire exposes their grapes to smoke! Register for free!
