Career Kick-Starters Workshop

CKS

Prepare for a Successful Career After Grad School

Give your graduate students and postdoctoral scholars a boost—host an ACS Career Kick-Starter Workshop!

Chemical science departments are encouraged to host this career-development event on their campus or online, so that grad students and postdocs can receive the knowledge and tools that would otherwise require weeks of individual effort to obtain.

For more information, please visit:

acs.org/careerkickstarter

Send inquiries about possible times and costs to GradEd@acs.org

After this workshop, participants should be able to:

Understand how skills, values, and opportunities intersect to create a satisfying career path.

Identify their own personal values and skills.

Develop goals to reach their desired career objectives.

Apply strategies for career exploration in different job sectors.

Conduct a successful job search.
